

Assignments for the first day

- 1- Write a program to display the following message
"This is my first c# program" using MessageBox class.
- 2- Write a program that can accept your name and age and display them as following:
Console.WriteLine("My name is{0} and My age is {1}",name , age);
- 3- Write a program that inputs from the user the radius of a circle and prints the circle's diameter, circumference, and area.
- 4- Write a program that reads in two integers and determines and prints whether the first integer is a multiple of the second (for example 15 is multiple of 3).
[Hint: use the Modulus operator].
- 5- Write a program that can get the integer values of the following characters A,B,C (that is their ASCII code).
[Hint: (int)'A'].
- 6- Write an application that displays in the console window a box and an arrow using asterisks (*) as follows:
