Topic 1, Microsoft SQL Server Installation Preparation (13 Questions)

QUESTION NO: 1

A client is questioning the order of items on a report. What stored procedure will you have the client run to tell you the sort order that was installed?

- A. select@@servername
- B. sp_helpsql
- C. sp_helpindex
- D. sp_helpsort

Answer: D

QUESTION NO: 2

A client complains of problems related to their SQL installation. The client runs the appropriate syntax in Query Analyzer to find their version number and reports to you that the version is 8.00.760. What version of SQL is the client running?

- A. SQL 7.0 w/SP2
- B. SQL 2000 w/SP3
- C. SQL 2000 w/SP2
- D. SQL 2000 w/no SP

Answer: B

QUESTION NO: 3

Which of the following may cause connectivity problems and is NOT recommended when setting up a Data Source Name (DSN) for use with eEnterprise?

- A. A mix of lower-case and upper-case letters in the DSN
- B. Checking Perform translation for character data
- C. The use of an IP address as the name of the SQL Servre machine
- D. The use of numbers and letters in the name of the SQL Server machine

Answer: B

QUESTION NO: 4

Which of the following options must be selected in the SQL Server Client Network Utility window?

- A. Default network library =Named Pipes
- B. Default network library =TCP/IP
- C. Automatic ANSI to OEM conversion turned OFF
- D. Automatic ANSI to OEM conversion turned ON

Answer: B

QUESTION NO: 5

You are the SQL Server Administrator for a large company. In order to maximize space on the server you have been asked to adjust the database and transaction log size. Which of the following tools would you use to fulfill this request?

- A. Enterprise Manager
- B. Great Plains Utilities
- C. Great Plains Client Application
- D. The size cannot be changed after installation

Answer: A

QUESTION NO: 6

Which of the following sort orders are support for Microsoft Business Solution Great Plains? (Choose the 2 that apply)

- A. Dictionary order, case sensitive
- B. Dictionary order, case insensitive
- C. Binary
- D. Dictionary order, case insensitive, uppercase preference

Answer: B,C

QUESTION NO: 7

You run a report for Great Plains that is running on a binary installation. Which of the following companies will appear SECOND?

- A. TJEnterprises
- B. the far side
- C. Tanks,Inc
- D. Apathetic Motivational Speakers Bureau

Answer: A

QUESTION NO: 8

A client complains of problems related to their SQL installation. The client runs the appropriate syntax in Query Analyzer to find their version number and reports to you that the version is 8.00.760. What version of SQL is the client running?

- A. SQL 7.0w/SP2
- B. SQL 2000 w/SP3
- C. SQL 2000 w/SP2
- D. SQL 2000 w/noSP

Answer: B

QUESTION NO: 9

Which of the following are recommended for a SQL Server Install? (Choose the 3 that apply)

- A. Log files on a RAID 1 array
- B. Leave TCP/IP checked
- C. Multilingual character set
- D. Mixed Mode Authentication

Answer: A,B,D

QUESTION NO: 10

You are the SQL Server Administrator for a large company. In order to maximize space on the server you have been asked to adjust the database and transaction log size. Which of the following tools would you use to fulfill this request?

- A. Enterprise Manager
- B. Great Plains Utilities
- C. Great Plains Client Application
- D. The size cannot be changed after installation

Answer: A

QUESTION NO: 11

Which of the following may cause connectivity problems and is NOT recommended when setting up a Data Source Name (DSN) for use with eEnterprise?

- A. A mix of lower-case and upper-case letters in the DSN
- B. Checking perform translation for character data.
- C. The use of an IP address as the name of the SQL Server machine
- D. The use of numbers and letters in the name of the SQL Server machine

Answer: B

QUESTION NO: 12

Which of the following options must be selected in the SQL Server Client Network Utility window?

- A. Default network library =Named Pipes
- B. Default network library = TCP/IP
- C. Automatic ANSI to OEM conversion turned OFF
- D. Automatic ANSI to OEM conversion turned ON

Answer: B

QUESTION NO: 13

What is the character set most compatible with Great Plains?

- A. ISO default character set 1252
- B. ISO default character set 52
- C. ISO default character set 256
- D. ISO default character set 437

Answer: A

Topic 2, Great Plains Installation and Setup (20 Questions)

QUESTION NO: 1

Which of the following network libraries is supported for Great Plains?

- A. Named Pipes
- B. Multi-Protocol
- C. TCP/IP
- D. NWLink IPX/SPX

Answer: C

QUESTION NO: 2

The Controller has drafted a list of the different security groups for Great Plains. You suggest setting up User Classes in Great Plains. To support your position, you can tell the Controller that User Class security has which of the following benefits? (Choose the 2 that apply)

- A. It is required**
- B. It applies to all companies
- C. It allows you to group users with similar security settings
- D. It must be set for each company separately

Answer: B,C

QUESTION NO: 3

The DYNSA user serves which of the following roles?

- A. Database Owner
- B. Great Plains Administrator
- C. System Administrator
- D. Default User for Great Plains

Answer: A

QUESTION NO: 4

What file is created when the account framework setup is saved that captures all account framework setup options?

- A. dexsql.log
- B. duinstall.log
- C. acctfram.txt
- D. installoptions.txt

Answer: C

QUESTION NO: 5

What does the Great Plains system password protect?

- A. All system databases
- B. The DYNAMIC database
- C. All options on the company menus
- D. All options on the system menus

Answer: D

QUESTION NO: 6

On a new data server installation, after installation from the CD to the server machine is complete, what is the next recommended step in the Great Plains installation process?

- A. Setup fiscal years
- B. Install 3rd party products
- C. Synchronize modified form and reports dictionaries
- D. Run Great Plains Utilities

Answer: D

QUESTION NO: 7

What is the maximum account length and maximum number of segments that can be configured for the Great Plains Account Framework?

- A. Account length of 66 and number of segments of 10
- B. Account length of 10 and number of segment of 66
- C. Account length of 25 and number of segments of 10
- D. Account length of 10 and number of segment of 25

Answer: A

QUESTION NO: 8

Which logins are created by Great Plains Utilities during the initialize system process?

- A. sa
- B. lessonuser 1
- C. lessonuser2
- D. DYNSA

Answer: D

QUESTION NO: 9

Which of the following components MUST be installed during a CLIENT installation of Great Plains?

- A. Great Plains Application

- B. Process Server
- C. Distributed Process Manager
- D. SQL Server objects

Answer: A

QUESTION NO: 10

Your goal is to establish grouping of users that determine a set of security privileges for the grouping.

Which System Manager option should you use?

- A. User Setup
- B. User Class Setup
- C. User Access
- D. Security Setup

Answer: B

QUESTION NO: 11

What must be done on all client installations of Great Plains to complete the installation process?

- A. Launch Utilities to Initialize the DYNAMICS database
- B. Launch Utilities to synchronize the Dynamics.dic to the server account framework
- C. Launch Utilities to synchronize the reports dictionaries
- D. Launch Utilities to update tables

Answer: B

QUESTION NO: 12

On a new data server installation, after installation from the CD to the server machine is complete, what is the next recommended step in the Great Plains installation process?

- A. Setup fiscal years
- B. Install 3rd party products

- C. Synchronize modified forms and reports dictionaries.
- D. Run Great Plains Utilities

Answer: D

QUESTION NO: 13

Which of the following are benefits of a Template installation of Great Plains? (Choose the 3 that apply)

- A. Reduced user interface time during installation
- B. Faster data server installation
- C. Consistency of client installations
- D. The installation CD is no longer required

Answer: A,C,D

QUESTION NO: 14

During Great Plains data server installation, which two components MUST be installed? (Choose the 2 that apply)

- A. Great Plains Application
- B. Process Server
- C. Distributed Process Manager
- D. SQL Server Objects

Answer: A,D

QUESTION NO: 15

Your goal is to determine individual access to windows, reports, and other accounting functions. What System Manager option should you use?

- A. User Setup
- B. User Class Setup
- C. User Access
- D. Security Setup

Answer: D

QUESTION NO: 16

Which logins are created by Great Plains Utilities during the initialize system process?

- A. sa
- B. lessonuser1
- C. lessonuser2
- D. DYNSA

Answer: D

QUESTION NO: 17

Which of the following components MUST to installed during a CLIENT installation of Great Plains?

- A. Great Plains Application
- B. Process Server
- C. Distributed Process Manager
- D. SQL Server objects

Answer: A

QUESTION NO: 18

The DYNSA user servers which of the following roles?

- A. Database Owner
- B. Great Plains Administrator
- C. System Administrator "
- D. Default User for Great Plains

Answer: A

QUESTION NO: 19

What file is created when the account framework setup is saved that captures all account framework setup options?

- A. dexsql.log
- B. duinstall.log
- C. acctfram.txt
- D. installoptions.txt

Answer: C

QUESTION NO: 20

What does the Great Plains system password protect?

- A. All system databases
- B. The DYNAMICS database
- C. All options on the company menus
- D. All options on the system menus

Answer: D

Topic 3, Great Plains Components and Features (14 Questions)

QUESTION NO: 1

The dex.ini file contains which of the following pieces of information? (Choose the 3 that apply)

- A. Last ODBC connection used
- B. Last company logged into
- C. OLE path for the workstation
- D. Location of the Great Plains help files

Answer: A,C,D

QUESTION NO: 2

Which of the following items are stored in the Report.dic? (Choose the 2 that apply)

- A. Original Great Plains reports
- B. Modified Great Plains reports
- C. New user-created Great Plains reports
- D. Third-party product reports

Answer: B,C

QUESTION NO: 3

Which file contains the paths to the Great Plains dictionaries?

- A. Dynamics.dic
- B. Dynutils.dic
- C. Dynutils.set
- D. Dynamics. set

Answer: D

QUESTION NO: 4

Which file is the application dictionary of Great Plains that contains the core business logic?

- A. Dynamic.dic
- B. Dynamics.exe
- C. Dynutils.dic
- D. Dex.dic

Answer: A

QUESTION NO: 5

Your client highest priority is for consistency between reports and ease of maintenance of reports. What is the simplest way to accomplish this?

- A. Store the reports dictionary locally on each workstation; update each workstation as reports change

- B. Store the reports dictionary locally on each workstation; write a batch file to update the reports dictionary, e-mail it to each user and have them execute the batch file.
- C. Maintain a separate server that stores only the reports dictionary
- D. Store the reports dictionary on a network share on the server, update it as reports change, and have all users access the dictionary on the share.

Answer: D

QUESTION NO: 6

Which file contains all Great Plains default settings?

- A. Dex.dic
- B. Dex.ini
- C. Dynamics.set
- D. Dynutils.set

Answer: B

QUESTION NO: 7

Which file is the Great Plains engine?

- A. Dynamics.dic
- B. Dynamics.exe
- C. Dynutils.exe
- D. Dex.exe

Answer: B

QUESTION NO: 8

In batch recovery, what user (s) can re-start the posting of a recovered batch?

- A. Only the user that posted the batch
- B. Only DYNSA
- C. Only the user that posted the batch or DYNSA

D. Any Great Plains user with posting rights

Answer: D

QUESTION NO: 9

Which file contains the paths to the Great Plains dictionaries?

- A. Dynamics.dic
- B. Dynutils.dic
- C. Dynutils.set
- D. Dynamics.set

Answer: D

QUESTION NO: 10

Which file contains all Great Plains default settings?

- A. Dex.dic
- B. Dex.ini
- C. Dynamics.set
- D. Synutils.set

Answer: B

QUESTION NO: 11

Which statements in the Great Plains defaults file, when set to TRUE, will generate a DexSQL Log? (Choose the 3 that apply)

- A. SQL Log AllODBCMessages
- B. SQLLogODBCMessages
- C. SQLLogErrors
- D. SQLLogSQLStmt

Answer: A,B,D

QUESTION NO: 12

Which of the following are advantages of Great Plains stored procedures? (Choose the 2 that apply)

- A. They are stored and executed on the server
- B. Once executed they remain in cache memory
- C. They are all hand written by Microsoft Business Solution developers
- D. Once executed, they are automatically flushed from memory

Answer: A,B,

QUESTION NO: 13

Which file is the application dictionary of Great Plains that contains the core business logic?

- A. Dynamics.dic
- B. Dynamics.exe
- C. Dynutils.dic
- D. Dex.dic

Answer: A

QUESTION NO: 14

The dex.ini file contains which of the following pieces of information? (Choose the 3 that apply)

- A. Last ODBC connection used
- B. Last company logged into
- C. OLE path for the workstation
- D. Location of the Great Plains help files

Answer: A,C,D

Topic 4, Great Plains Administration and Optimization (20 Questions)

QUESTION NO: 1

Which Great Plains data recovery procedures will use the relationship between tables to correct or replace data? Choose the 2 that apply

- A. Reconcile
- B. Recompile
- C. Check Links
- D. Rebuild

Answer: A,C

QUESTION NO: 2

Which of the following Database Maintenance Wizard options are recommended by Microsoft Business Solution? Choose the 3 that apply

- A. Backup the database and transaction log as part of the maintenance plan.
- B. Reorganize data and index pages
- C. Check database integrity
- D. Do not backup the database as part of the maintenance plan

Answer: A,B,C

QUESTION NO: 3

What are the major advantages of implementing Microsoft Business Solution RAID array recommendations on your SQL Server machine? Choose the 2 that apply

- A. Better read/write performance
- B. Increased CPU PERFORMANCE
- C. Increased network performance
- D. Fault tolerance

Answer: A,D

QUESTION NO: 4

Which Microsoft Business Solution recommended DBOC command can repair minor database problem?

- A. DBCC Checkcatalog
- B. DBCC DBReindex
- C. DBCC Checkalloc
- D. DBCC CHeckdb

Answer: D

QUESTION NO: 5

Your goal is optimize SQL Server and Great Plains performance. Which of the following selections would you make? Choose the 3 that apply

- A. Boost performance for background services
- B. Limit the network to one protocol
- C. Update statistics weekly as part of the database maintenance plan
- D. Run sp_recompile daily

Answer: A,B,C

QUESTION NO: 6

Which of these processor indicates is an indicator of poor server performance?

- A. Percent processor time of 65%
- B. Server queue length of 1
- C. Processor queue length of 5
- D. Decrease in processor interrupts/second

Answer: C

QUESTION NO: 7

You wish to optimize your stored procedures by triggering the stored procedures to re-write themselves. Which SQL Maintenance procedure do you run?

- A. Update statistics
- B. Recompile
- C. Reconcile
- D. Check Links

Answer: B

QUESTION NO: 8

If a customer is experiencing less than optimal SQL performance, which tools could use to determine the cause? Choose the 3 that apply

- A. The SQL Profiler Log
- B. The Windows 2000 System Monitor
- C. The SQL Maintenance window within Great Plains
- D. The DEXSQL. LOG

Answer: A,B,D

QUESTION NO: 9

Your goal is to optimize SQL Server and Great Plains performance. What of the following selections would you make? Choose the 2 that apply

- A. Implement RAID 1 for log files**
- B. Have at least 256MB of RAM
- C. Use a multiprocessor machine that is set up as a domain controller
- D. Use at least 32 bit network cards

Answer: A,D

QUESTION NO: 10

Which SQL Server option does Microsoft Business Solutions recommended using to schedule all of the Great Plains recommended periodic maintenance procedures?

- A. Query Analyzer
- B. DTS Wizards
- C. Database Maintenance Wizard
- D. Service Manager

Answer: C

QUESTION NO: 11

What is the recommended RAID setup for Great Plains files?

- A. Logs on RAID 5, data on RAID 1 or 10 application files on RAID 1
- B. Logs on RAID 5, data on RAID 5, application files on RAID 1
- C. Logs on RAID 1, data on RAID 10, application files on RAID 5
- D. Logs on RAID 1, data on RAID 5, or 10, application files on RAID 1

Answer: D

QUESTION NO: 12

Which SQL Server option does Microsoft Business Solutions recommend using to schedule all of the Great Plains recommended periodic maintenance procedures?

- A. Query Analyzer
- B. DTS Wizards
- C. Database Maintenance Wizard
- D. Service Manager

Answer: C

QUESTION NO: 13

Which of the following Database Maintenance Wizard options are recommended by Microsoft Business Solutions? (Choose the 3 that apply)

- A. Backup the database and transaction log as part of the maintenance plan.
- B. Reorganize data and index pages

- C. Check database integrity
- D. Do not backup the database as apart of the maintenance plan

Answer: A,B,C

QUESTION NO: 14

As the Great Plains Administrator, you are asked to explain the difference between Security, User Class Security, and Advanced Security to the end users. When sating the benefits of Advanced Security, you could use which of the following points? (Choose the 3 that apply)

- A. Ability to "roll up" individual user settings to the user class
- B. Ability to define more detailed security for users
- C. Ability to revert security settings
- D. Ability to import and Export security settings

Answer: A,C,D

QUESTION NO: 15

What are the major advantages of implementing Microsoft Business Solutions RAID array recommendations on your SQL Server machine? (Choose the 2 that apply)

- A. Better read/write performance
- B. Increased CPU performance
- C. Increased network performance
- D. Fault tolerance

Answer: A,D

QUESTION NO: 16

Which Great Plains data recovery procedures will use the relationships between tables to correct or replace data? (Choose the 2 that apply)

- A. Reconcile
- B. Recompile

- C. Check Links
- D. Rebuild

Answer: A,C

QUESTION NO: 17

Which of the following Great Plains resources does Microsoft Business Solutions recommend backing up on the daily basis? (Choose the 2 that apply)

- A. Reports.dic
- B. Forms.dic
- C. Dynamics.DB
- D. Company **DB**

Answer: C,D

QUESTION NO: 18

You wish to optimize your stored procedures by triggering the stored procedures to re-write themselves. Which SQL Maintenance procedure do you run?

- A. Update statistics
- B. Recompile
- C. Reconcile
- D. Check Links

Answer: B

QUESTION NO: 19

Which Microsoft Business Solutions recommended DBCC command can repair minor database problems?

- A. DBCC Checkcatalog
- B. DBCC DBReindex
- C. DBCC Checkalloc
- D. DBCC Checkdb

Ans: D

QUESTION NO: 20

Which of the following database options will negatively impact Great Plains performance when selected?
(Choose the 2 that apply)

- A. Full recovery model
- B. Bulk-logged model
- C. Auto close
- D. Auto shrink

Answer: C,D

Topic 5, Great PlainsProcess Server (10 Questions)

QUESTION NO: 1

What restriction is placed on the number of Process Servers in a network?

- A. Only one per network
- B. Three Process Servers per DPM
- C. The number of Process Servers in a Service must be consistent between Services
- D. Three Process Servers per Service

Answer: C

QUESTION NO: 2

What is the required protocol for Process Server?

- A. IPX/SPX
- B. TCP/IP
- C. Named Pipes
- D. Multiprotocol

Answer: B

QUESTION NO: 3

Which of the following must be for a client process to run on a Remote Process Server? Choose 3 that apply

- A. The Process Server must be part of a service
- B. In User Preferences, the option for Remote Processing must be set to Remote
- C. TCP/IP must be the default network library
- D. The process must have the Remote checkbox checked in process Server setup.

Answer: B,C,D

QUESTION NO: 4

What is the proper order for launching the component of the Process Server network?

- A. 1. Process Server 2. DPM 3. Client application
- B. 1.Process Server 2.Client application 3.DPM
- C. 1.dpm 2.Client application 3.Process Server
- D. 1.DPM 2.Process Server 3.Client application

Answer: D

QUESTION NO: 5

A client sends out a process for remote processing. The process is sent to a service. The DPM is not running. Where will the process be run?

- A. On the first Process Server in the Service list
- B. On the SQL Server
- C. On the client machine
- D. On the client default Process Server

Answer: A

QUESTION NO: 6

What option must be marked to enable the creation of a Process Server log file?

- A. Enable load balancing
- B. Verify connection on add
- C. Report destination to a printer
- D. Track start and end times

Answer: D

QUESTION NO: 7

Which of the following is a requirement of the Process Server network?

- A. All machines in the network must be at least Windows NT workstations
- B. All machines must have the same host names
- C. The Data Source Name (DSN) of the client must match the DSN of the Process Server
- D. Process Server must be part of a Service

Answer: C

QUESTION NO: 8

What restriction is placed on the number of Process Servers in a network?

- A. Only one per network
- B. Three Process Servers per DPM
- C. The number of Process Servers in a Service must be consistent between Services
- D. Three Process Servers per Service

Answer: C

QUESTION NO: 9

Which of these statements are true regarding the Distributed Process Manager? (Choose the 3 that apply)

- A. Load balancing must be enabled in Process Server setup before DPM can be used
- B. DPM setup requires entering a fixed IP address

- C. Only one DPM is allowed per network
- D. Process Servers and client register with the DPM

Answer: A,C,D

QUESTION NO: 10

The DPM will handle load balancing for what component of the DPS system?

- A. Individual Process Servers
- B. Services
- C. Clients
- D. Multiple Process Servers on a multi-processor machine

Answer: B

Topic 6, Great PlainsFRx Install (3 Questions)

QUESTION NO: 1

For FRx installation, what is the purpose of creating ashad folder on the server?

- A. This is where the FRx application will be installed
- B. This will be the location of the Reports.dic
- C. This is where all sysdata and iodata will be stored
- D. This is the folder where security will be managed

Answer: C

QUESTION NO: 2

After installing FRx on a client machine, what is the purpose of changing the SYSDATA path?

- A. To allow clients to run the application from the server
- B. To allow clients to store a reports dictionary locally
- C. To allow clients to store data locally
- D. To allow clients to access data from the server

Answer: D

QUESTION NO: 3

Which installation option is recommended for FRx installation?

- A. Local client
- B. Network client
- C. Thin client
- D. Thick client

Answer: A

Topic 7, Great Plains Troubleshooting (20 Questions)

QUESTION NO: 1

You had a power failure during the initialization of a new Great Plains company. You delete the company in Great Plains and the database from Enterprise Manager. You re-start the initialization process but the initialization fails. Which of these could be the cause of the failure? Choose the 2 that apply.

- A. The OS files for the company database still exist

- C. The SY01500 Company Master table still holds a record of the company
- D. The sample users LESSONUSER1 and LESSONUSER2 still exist in the Dynamics database.

Answer: A,C

QUESTION NO: 2

A client calls you with concerns about their Great Plains installation. The client tells you that they are running release 8.0 of Great Plains, version 8.00.194 of SQL, sort order 50, ISO default character set, and TCP/IP is the default network library. What version of SQL Server is client running?

- A. SQL Server 7.0 with SP1
- B. SQL Server 7.0 with SP2
- C. SQL Server 2000 with no SP
- D. SQL Server 2000 with SP1

Answer: C

QUESTION NO: 3

A user forgot their password. Which of the following will reset the user password to blank?

- A. Run the T-SQL command "update sy01400 set password = convert (binary) where userid = userid]?"
- B. Have the user login to Great Plains, navigate to the User Performances window, and change their password.
- C. Login to Great Plains as SA, navigate to the User Setup window, select the user and blank out the password.
- D. Run the T-SQL command "update sy02400 set password = 0x00202020202020202020202020202020"

Answer: C

QUESTION NO: 4

You have created the Great Plains user Sam. Sam reports to you the he can log into the server while launching Great Plains, but he cannot see the company database in his list of companies in the company login screen. What is the cause of Sam's problem?

- A. Great Plains SQL options were turned off while Sam was created
- B. Sam has been deleted at the SQL level
- C. Sam has not been granted company access in Great Plains User Access
- D. Sam is using the incorrect password to login

Answer: C

QUESTION NO: 5

You are receiving ADBMS 515 error. What is the best resource to find detailed information about what that error message means?

- A. Windows 2000 System Log
- B. Profile Trace
- C. Create a DEXSQL LOG
- D. SQL Books Online

Answer: D

QUESTION NO: 6

You discover that are missing a DYNAMICS table. What file can you use to re-create the table?

- A. Tables.cmp
- B. Process.cmp
- C. Tables.sys
- D. Procs.sys

Answer: C

QUESTION NO: 7

Which of the following sources will provide information regarding the success or failure of a Bulk Copy Operations? Choose the 2 that apply.

- A. OS files with a .err extension
- B. OS files with a .out extension
- C. OS files with a .bcp extension
- D. OS files with a .txt extension

Answer: A,C

QUESTION NO: 8

You are logged in to Great Plains and you are trying to change the password Lessonuser1 in the User Setup window. The Save button and the password field are grayed out. Which of the following will cause this?

- A. You are not logged in as SA.
- B. DB owner is not set to DYNSA
- C. Lessonuser1 does not have access to the current company
- D. Lessonuser1 has been deleted at the SQL level.

Answer: A

QUESTION NO: 9

You launch Great Plains and are able to connect to the server but are unable to login to the sample company. You can login to other companies. Which of the following are possible reasons for login failure?

- A. Your password has become corrupted
- B. A stored procedure in the sample company database has become corrupted
- C. Your login has been deleted
- D. Your userid is no longer listed in the sysxloins table

Answer: B

QUESTION NO: 10

You are having trouble with a Great Plains table and you determine that you must drop and recreate the table but keep the data that is in the table. Which of the following will accomplish this?

- A. Delete the table and re-create it using DTS
