

Exam Name:	GP 9.0 Integration Manager VBA		
Exam Type:	Microsoft		
Exam Code:	MB3-462	Total Questions:	150

Question: 1

Once you have created an import definition, which of the following is true?

- A - You can use that import only for the Company you created it in
- B - You can use that import for any Company
- C - You can use that import only for the sample company
- D - You must be logged in as DYNOSA to run the import

Answer: B

Question: 2

What two sets of tables contain the Import Definitions? Choose the 2 that apply.

- A - SY50000.idx and SY50000.dat
- B - SY50100.idx and SY50100.dat
- C - SY60000.idx and SY60000.dat
- D - SY50001.idx and SY50001.dat

Answer: A, B

Question: 3

Which of the follow circumstances will always cause Import Utility to reject records?

- A - Field values exceed the maximum field length
- B - The source file contains column headings
- C - Records are duplicates of records that already exist in the table
- D - Key fields are in lowercase

Answer: C

Question: 4

What file formats does Import Utility support? Choose the 2 that apply.

- A - Tab Delimited file
- B - SQL database
- C - Comma Delimited file
- D - All of the Above

Answer: A, C

Question: 5

Which of the following is a resource that may be useful in setting up an import? Choose the 3 that apply.

- A - Database Diagrams
- B - Resource Descriptions
- C - Microsoft SQL Query Analyzer
- D - SQL Books Online

Answer: A, B, C

Question: 6

Which of the following capabilities does Import Utility possess?

- A - Insert New Records

Exam Name:	GP 9.0 Integration Manager VBA		
Exam Type:	Microsoft		
Exam Code:	MB3-462	Total Questions:	150

- B - Update Existing Records
- C - Both Insert and Update
- D - Neither, it is a read-only tool

Answer: A

Question: 7

What fields are required, or do not have the option to use default, when running a GL Accounts integration?

- A - Account Number, Description, Posting Type
- B - Account Number, Category, Posting Type
- C - Account Number, Description, Category
- D - Account Number, Category, Typical Balance

Answer: C

Question: 8

On a General Ledger Account integration, which of the following is acceptable for the Account Category field?

- A - The name associated with the Account Category, case insensitive, e.g. cash.
- B - The number associated with the Account Category in the GL00102, e.g. 15.
- C - The name associated with the Account Category, case sensitive, e.g. Cash.
- D - The name or number associated with the Account Category

Answer: C

Question: 9

Which of the following is not a Great Plains Standard Adapter?

- A - Currency Accounts
- B - Variable Allocation Accounts
- C - Unit Accounts
- D - Payroll Manual Checks

Answer: A

Question: 10

What is the minimum amount of queries needed for a Payroll Transaction Integration based on one source file?

- A - None
- B - 1
- C - 2
- D - 3

Answer: C

Question: 11

Which script event is the last to run when an integration is run?

- A - After Document script
- B - After Integration script
- C - After Source script

Exam Name:	GP 9.0 Integration Manager VBA		
Exam Type:	Microsoft		
Exam Code:	MB3-462	Total Questions:	150

D - Field level script

Answer: C

Question: 12

You have one source file. In order to integrate a journal entry into the General Ledger, what must you specify in the header source so that each row isn't brought over as a separate journal entry?

- A - Order by on the column that is the same value for each row
- B - Group by on the column that is the same value for each row
- C - Check the "Is Key" box on the column that is the same value for each row
- D - Set the datatype of the Journal Entry number as String

Answer: B

Question: 13

Integration Manager can add a Batch ID for a transaction integration. To do so, in the destination mapping options tab, which option must be set?

- A - Create New Batch - True
- B - Create New Batch - Yes
- C - Add New Batch - True
- D - Missing Batch - Add New Batch

Answer: D

Question: 14

Which of the following is an available Storage Type for the Integration Log? Choose the 2 that apply.

- A - File
- B - Database
- C - Spreadsheet
- D - XML

Answer: A, B

Question: 15

Which of the following is NOT available as a rule in the option tab for the entries section of the General Ledger transaction destination mapping window?

- A - Use Default
- B - Default Non-Imported
- C - Use Source Recordset
- D - Empty

Answer: B

Question: 16

What of the following information can NOT be integrated on a Sales Order Processing Order integration with the Great Plains standard adapter?

- A - A different ship to address id for each line item.
- B - Lot and serial numbers for line items.
- C - Recurring Order information

Exam Name:	GP 9.0 Integration Manager VBA		
Exam Type:	Microsoft		
Exam Code:	MB3-462	Total Questions:	150

D - Line Item Distribution Accounts

Answer: C

Question: 17

Which of the following Master records can be updated with the Great Plains Standard Adapter? Choose the 3 that apply.

- A - Fixed Allocation Accounts
- B - Unit Accounts
- C - Item Resource Planning Maintenance
- D - Customers

Answer: A, B, D

Question: 18

Which of the following are sources for the Great Plains Standard Adapter? Choose the 2 that apply.

- A - XML
- B - Fixed width file
- C - Simple ODBC
- D - Excel 5.0 or higher file

Answer: A, C

Question: 19

Which of the following can be specified for the Log Level of detail? Choose the 2 that apply.

- A - Database
- B - File
- C - None
- D - Trace

Answer: C, D

Question: 20

When Integration Manager is installed, what is checked?

- A - Minimum Microsoft Dynamics GP version is checked
- B - Minimum system requirements are checked
- C - None of the above
- D - All of the above

Answer: B

Question: 21

Where can you change the maximum number of errors and warnings?

- A - In the Relationships window
- B - In the Source Properties window
- C - In the Object Browser window
- D - In the Integration Properties window

Answer: D

Exam Name:	GP 9.0 Integration Manager VBA		
Exam Type:	Microsoft		
Exam Code:	MB3-462	Total Questions:	150

Question: 22

A Payables Transaction integration has been created. It is based on one source file that includes debit and credit distributions. When run, only one distribution account is integrated. What should be checked to resolve this problem? Choose the 3 that apply.

- A - Two source queries are required: One for transaction information and one for distribution information.
- B - The transaction information source query must be sorted by the same field used in the query relationship.
- C - The relationship between the source queries needs to be pointing from the transaction (header) source query to the distribution(detail) source query.
- D - In the Destination Mapping, click on the Entries collection and then the Options tab. Check to make sure the Source column is referencing detail source query and not the header source query.

Answer: A, C, D

Question: 23

What points of integration does Microsoft Dynamics GP offer? Choose the 3 that apply.

- A - Database
- B - Business Logic
- C - Windows
- D - User Defined

Answer: A, B, C

Question: 24

What is the default Relationship Type?

- A - There can be 0 or 1 record in the child for each record in the master
- B - There must be exactly 1 record in the child for each record in the master
- C - There can be 0 or more records in the child for each record in the master
- D - There must be at least 1 record in the child for each record in the master

Answer: C

Question: 25

How does Microsoft Dynamics GP define a business object?

- A - Any window in Microsoft Dynamics GP
- B - Any window in Microsoft Dynamics GP where data can be entered or saved
- C - Any table in Microsoft SQL used by Microsoft Dynamics GP
- D - Any table group in Microsoft SQL used by Microsoft Dynamics GP

Answer: B

Question: 26

How can you preview a Source?

- A - Open the source properties window and go to the Sorting tab
- B - Open the source properties window and go to the Columns tab
- C - Right click on the source name
- D - Go into the Object Browser

Exam Name:	GP 9.0 Integration Manager VBA		
Exam Type:	Microsoft		
Exam Code:	MB3-462	Total Questions:	150

Answer: C

Question: 27

What can be used to restrict access to Integration Manager and Import Utility?

- A - Microsoft Dynamics GP Security
- B - Microsoft SQL Server security
- C - Installing only on workstations where the tools should be used
- D - Access cannot be restricted

Answer: A

Question: 28

The following are a list of several vbscripting events. Which selection lists the events in the correct order?

- A - Before Integration, Before Source, After Source, After Integration
- B - Before Source, Before Integration, After Source, After Integration
- C - Before Source, Before Integration, After Integration, After Source
- D - Before Integration, Before Source, After Integration, After Source

Answer: D

Question: 29

Which of the following types of translations can be created? Choose the 2 that apply.

- A - Universal Translation
- B - Global Translation
- C - Local Translation
- D - Fixed Translation

Answer: B, C

Question: 30

What is updated when Integration Manager is installed, and Microsoft Dynamics GP is launched?

- A - Dynamics. set
- B - IM.MDB
- C - All of the above
- D - None of the above

Answer: A

Question: 31

Which of the following destinations are available with the Great Plains Standard Adapter? Choose the 2 that apply.

- A - Bank Reconcile
- B - Purchase Order Transaction
- C - Invoicing Transaction
- D - Unit Accounts

Answer: A, D

Exam Name:	GP 9.0 Integration Manager VBA		
Exam Type:	Microsoft		
Exam Code:	MB3-462	Total Questions:	150

Question: 32

Where can you delete an integration? Choose the 2 that apply.

- A - Under Tools - Options
- B - Object Browser
- C - Within the "Open Integration" window
- D - Under File -Delete Integration

Answer: B, C

Question: 33

If the user wishes to only integrate transactions for a certain date, what would be the best way to limit the data?

- A - Local Translation
- B - Global Translation
- C - Row Restriction
- D - Order By

Answer: C

Question: 34

If you do NOT mark "First Row Contains Column Names" in the Source properties, what default names are assigned?

- A - Column1, Column2, Column3, etc.
- B - Name1, Name2, Name3, etc.
- C - F1, F2, F3, etc.
- D - None of the Above

Answer: C

Question: 35

Before running an integration with the Great Plains Standard Adapter, do you have to be logged into the Microsoft Dynamics GP company you would like to integrate to?

- A - Yes
- B - No, it integrates into the last company that was logged into
- C - No, you specify the company in the integration
- D - No, the integration properties include a company database setting

Answer: A

Question: 36

Which of the following destinations will allow you to update existing records in Microsoft Dynamics GP?

- A - Accounts and General Ledger Transactions
- B - Customers and Cash Receipts
- C - All Master Record integrations and the Exchange Rate integration
- D - Payroll Transaction integrations

Answer: C

Question: 37

Page 7 of 30		© SelfExamEngine.com
--------------	--	----------------------

Exam Name:	GP 9.0 Integration Manager VBA		
Exam Type:	Microsoft		
Exam Code:	MB3-462	Total Questions:	150

Which of the following sources will allow Integration Manager to create a rejection file?

- A - Simple ODBC Source
- B - XML Source
- C - Text Source
- D - Advanced ODBC Source

Answer: C

Question: 38

What is a key difference between the Simple ODBC and Advanced ODBC source?

- A - Simple ODBC can only pull data from Excel spreadsheets
- B - Advanced ODBC can only be used by the 'sa' user
- C - Simple ODBC must be the only source on an integration
- D - Advanced ODBC requires a SQL statement to be written

Answer: D

Question: 39

Which of the following statements are true regarding Integration Manager? Choose the 2 that apply.

- A - Data can be translated
- B - Data can be integrated from ODBC compliant sources
- C - Required fields cannot be defaulted for any sources
- D - No data validation is performed for any destinations

Answer: A, B

Question: 40

If an integration is deleted, which of the following items are NOT deleted with it? Choose the 2 that apply.

- A - Sources Queries
- B - Data Sources
- C - Query Relationships
- D - Destination Mappings

Answer: A, B

Question: 41

With the XML Source Adapter, after you select the XML data file you wish to import from, the Source Settings window appears. The Source Settings window contains which of the following settings? Choose the 3 that apply.

- A - The File path
- B - Filter
- C - Use Filter
- D - Password

Answer: A, B, C

Question: 42

The Direct to Table Adapter integrates at what level?

Exam Name:	GP 9.0 Integration Manager VBA		
Exam Type:	Microsoft		
Exam Code:	MB3-462	Total Questions:	150

- A - Window level
- B - Business logic level
- C - Database level
- D - All of the Above

Answer: C

Question: 43

If you attempting to perform a Sales Order Processing transaction integration with Integration Manager, which of the following would not be a selection available when adding a source?

- A - XML
- B - VB Script
- C - ODBC
- D - Text

Answer: B

Question: 44

Which source type limits the integration to one source?

- A - XML
- B - Advanced ODBC
- C - Text File
- D - Simple ODBC

Answer: A

Question: 45

What can you do using the XML Source Properties window? Choose the 2 that apply.

- A - Add child recordsets
- B - Add text file sources
- C - Add new fields
- D - Change the XML source file

Answer: A, C

Question: 46

Which of the following is NOT true regarding the SQL Optimized Adapter?

- A - General Ledger Transactions can be integrated
- B - New records can be inserted
- C - Existing records can be updated
- D - General Ledger Accounts can be integrated

Answer: C

Question: 47

Which of the following statements are true regarding custom destination recordsets?

- A - They must be linked to database tables
- B - There must be more than one per destination
- C - They are linked to business objects

Exam Name:	GP 9.0 Integration Manager VBA		
Exam Type:	Microsoft		
Exam Code:	MB3-462	Total Questions:	150

D - None of the above

Answer: A

Question: 48

When creating a custom destination, which statements are true regarding, the "Synchronize Fields with Dexterity" option? Choose the 2 that apply.

- A - Must be performed when Microsoft Dynamics GP is open
- B - Must be performed when Microsoft Dynamics GP is closed
- C - Is Not Required
- D - Is Required

Answer: A, C

Question: 49

Which of the following resources are recommended when creating a Custom Destination? Choose the 3 that apply.

- A. Database Diagrams
- B - Resource Descriptions in Microsoft Dynamics GP
- C - Microsoft Dynamics GP Report Writer
- D - Microsoft SQL Query Analyzer

Answer: A, B, D

Question: 50

XML is an abbreviation for?

- A - Extensible Markup Language
- B - External Markup Language
- C - External Migration Language
- D - Extensible Media Language

Answer: A

Question: 51

Which of the following is a resource that may be useful in setting up an import? Choose the 3 that apply.

- A - Database Diagrams
- B - Resource Descriptions
- C - Microsoft SQL Query Analyzer
- D - SQL Books Online

Answer: A, B, C

Question: 52

Which of the following capabilities does Import Utility possess?

- A - Insert New Records
- B - Update Existing Records
- C - Both Insert and Update
- D - Neither, it is a read-only tool

Exam Name:	GP 9.0 Integration Manager VBA		
Exam Type:	Microsoft		
Exam Code:	MB3-462	Total Questions:	150

Answer: A

Question: 53

What two sets of tables contain the Import Definitions? Choose the 2 that apply.

- A - SY50000.idx and SY50000.dat
- B - SY50100.idx and SY50100.dat
- C - SY60000.idx and SY60000.dat
- D - SY50001.idx and SY50001.dat

Answer: A, B

Question: 54

When using the Import Utility, what will happen to invalid data types?

- A - Rejected
- B - Converted and truncated
- C - Ignored
- D - Translated based on your setup

Answer: B

Question: 55

Once you have created an import definition, which of the following is true?

- A - You can use that import only for the Company you created it in
- B - You can use that import for any Company
- C - You can use that import only for the sample company
- D - You must be logged in as DYNOSA to run the import

Answer: B

Question: 56

What file formats does Import Utility support? Choose the 2 that apply.

- A - Tab Delimited file
- B - SQL database
- C - Comma Delimited file
- D - All of the Above

Answer: A, C

Question: 57

When creating a Simple ODBC query to access an Excel spreadsheet, what step must be done in Excel in order to see the data?

- A - Give the spreadsheet a name that matches the query name
- B - Define a named range within the spreadsheet
- C - Format the spreadsheet as a "general" format
- D - The first Excel row must have column names

Answer: B

Question: 58

How many queries are required when creating an accounts integration with one source file?

Exam Name:	GP 9.0 Integration Manager VBA		
Exam Type:	Microsoft		
Exam Code:	MB3-462	Total Questions:	150

- A - 0
- B - 1
- C - 2
- D - 3

Answer: B

Question: 59

What points of integration does Microsoft Dynamics GP offer? Choose the 3 that apply.

- A - Database
- B - Business Logic
- C - Windows
- D - User Defined

Answer: A, B, C

Question: 60

When integrating Customers, what are the available Destination Edit Modes? Choose the 3 that apply.

- A - Insert Only
- B - Update Only
- C - Insert and Update
- D - Update Existing Records Only

Answer: A, B, C

Question: 61

If the user wishes to only integrate transactions for a certain date, what would be the best way to limit the data?

- A - Local Translation
- B - Global Translation
- C - Row Restriction
- D - Order By

Answer: C

Question: 62

What is the default Relationship Type?

- A - There can be 0 or 1 record in the child for each record in the master
- B - There must be exactly 1 record in the child for each record in the master
- C - There can be 0 or more records in the child for each record in the master
- D - There must be at least 1 record in the child for each record in the master

Exam Name:	GP 9.0 Integration Manager VBA		
Exam Type:	Microsoft		
Exam Code:	MB3-462	Total Questions:	150

Answer: C

Question: 63

Integration Manager can add a Batch ID to a transaction integration. To do so, in the destination mapping options tab, which option must be set?

- A - Create New Batch - True
- B - Create New Batch -Yes
- C - Add New Batch - True
- D - Missing Batch - Add New Batch

Answer: D

Question: 64

What can be used to restrict access to Integration Manager and Import Utility?

- A - Microsoft Dynamics GP Security
- B - Microsoft SQL Server security
- C - Installing only on workstations where the tools should be used
- D - Access cannot be restricted

Answer: A

Question: 65

What is a key difference between the Simple ODBC and Advanced ODBC source?

- A - Simple ODBC can only pull data from Excel spreadsheets
- B - Advanced ODBC can only be used by the 'sa' user
- C - Simple ODBC must be the only source on an integration
- D - Advanced ODBC requires a SQL statement to be written

Answer: D

Question: 66

A Payables Transaction integration has been created. It is based on one source file that includes debit and credit distributions. When run, only one distribution account is integrated. What should be checked to resolve this problem? Choose the 3 that apply.

- A - Two source queries are required: One for transaction information and one for distribution information.
- B - The transaction information source query must be sorted by the same field used in the query relationship.
- C - The relationship between the source queries needs to be pointing from the transaction (header) source query to the distribution(detail) source query.
- D - In the Destination Mapping, click on the Entries collection and then the Options tab. Check to make sure the Source column is referencing detail source query and not the header source query.

Answer: A, C, D

Question: 67

Which of the following actions is a required step to schedule an integration to run? Choose the 3 that apply.

- A - Create a Microsoft Dynamics GP Login Macro

Exam Name:	GP 9.0 Integration Manager VBA		
Exam Type:	Microsoft		
Exam Code:	MB3-462	Total Questions:	150

- B - Create a BAT file to run an integration
- C - Create a macro to log out of Microsoft Dynamics GP
- D - Create a BAT tile to launch Microsoft Dynamics GP

Answer: A, B, D

Question: 68

If you do NOT mark "First Row Contains Column Names" in the Source properties, what default names are assigned?

- A - Column1 Column2, Column3, etc.
- B - Name1, Name2, Name3, etc.
- C - F1, F2, F3, etc.
- D - None of the Above

Answer: C

Question: 69

If an integration is deleted, which of the following items are NOT deleted with it? Choose the 2 that apply.

- A - Sources Queries
- B - Data Sources
- C - Query Relationships
- D - Destination Mappings

Answer: A, B

Question: 70

On a General Ledger Account integration, which of the following is acceptable for the Account Category field?

- A - The name associated with the Account Category, case insensitive, e.g. cash.
- B - The number associated with the Account Category in the GL00102, e.g. 15.
- C - The name associated with the Account Category, case sensitive, e.g. Cash.
- D - The name or number associated with the Account Category

Answer: C

Question: 71

What is NOT one of the benefits of using the Integration Manager Great Plains Standard Adapter?

- A - Data is validated before entering the system
- B - You can integrate into any destination
- C - You can update Master tables
- D - Data can be filtered or restricted before integrating

Answer: B

Question: 72

Which of the following destinations are available with the Great Plains Standard Adapter? Choose the 2 that apply.

- A - Bank Reconcile

Exam Name:	GP 9.0 Integration Manager VBA		
Exam Type:	Microsoft		
Exam Code:	MB3-462	Total Questions:	150

- B - Purchase Order Transaction
- C - Invoicing Transaction
- D - Unit Accounts

Answer: A, D

Question: 73

Before running an integration with the Great Plains Standard Adapter, do you have to be logged into the Microsoft Dynamics GP company you would like to integrate to?

- A - Yes
- B - No, it integrates into the last company that was logged into
- C - No, you specify the company in the integration
- D - No, the integration properties include a company database setting

Answer: A

Question: 74

When Integration Manager is installed, what is checked?

- A - Minimum Microsoft Dynamics GP version is checked
- B - Minimum system requirements are checked
- C - None of the above
- D - All of the above

Answer: B

Question: 75

Cash Receipts are being integrated and applied to Invoices. When looking at the Apply Sales Document window, nothing is applied. What should be checked to resolve this? Choose the 3 that apply.

- A - The invoices (or debit documents) must be unposted, and saved to batches.
- B - In the Destination Mapping, click on the Cash Apply collection and then the Options tab. Check to make sure the Rule column is marked to Use Source Recordset.
- C - The invoices (or debit documents) must be posted
- D - The invoices (or debit documents) must be sitting in the RM Open table

Answer: B, C, D

Question: 76

A key difference between local and global translations is? Choose the 2 that apply.

- A - Local translations cannot be changed
- B - Local translations can only be used on the field and integration where they are created
- C - Global translations can be used on multiple integrations
- D - Global translations can only be used on integrations with the same destination

Answer: B, C

Question: 77

Each field that has their Field Rule set to "Use Source Field" will display additional settings under the Rule Properties section. The settings include which of the following options? Choose the 3 that apply.

Exam Name:	GP 9.0 Integration Manager VBA		
Exam Type:	Microsoft		
Exam Code:	MB3-462	Total Questions:	150

- A - Translation
- B - Use System Date
- C - If Null
- D - Case Conversion

Answer: A, C, D

Question: 78

Which of the following sources will allow Integration Manager to create a rejection file?

- A - Simple ODBC Source
- B - XML Source
- C - Text Source
- D - Advanced ODBC Source

Answer: C

Question: 79

Where can you delete an integration? Choose the 2 that apply.

- A - Under Tools - Options
- B - Object Browser
- C - Within the "Open Integration" window
- D - Under File -Delete Integration

Answer: B, C

Question: 80

Which of the following Master records can be updated with the Great Plains Standard Adapter? Choose the 3 that apply.

- A - Fixed Allocation Accounts
- B - Unit Accounts
- C - Item Resource Planning Maintenance
- D - Customers

Answer: A, B, D

Question: 81

Where can you change the maximum number of errors and warnings?

- A - In the Relationships window
- B - In the Source Properties window
- C - In the Object Browser window
- D - In the Integration Properties window

Answer: D

Question: 82

Which of the following statements are true regarding Integration Manager? Choose the 2 that apply.

- A - Data can be translated
- B - Data can be integrated from ODBC compliant sources
- C - Required fields cannot be defaulted for any sources

Exam Name:	GP 9.0 Integration Manager VBA		
Exam Type:	Microsoft		
Exam Code:	MB3-462	Total Questions:	150

D - No data validation is performed for any destinations

Answer: A, B

Question: 83

Which script event is the last to run when an integration is run?

- A - After Document script
- B - After Integration script
- C - After Source script
- D - Field level script

Answer: C

Question: 84

The following are a list of several vbscripting events. Which selection lists the events in the correct order?

- A - Before Integration, Before Source, After Source, After Integration
- B - Before Source, Before Integration, After Source, After Integration
- C - Before Source, Before Integration, After Integration, After Source
- D - Before Integration, Before Source, After Integration, After Source

Answer: D

Question: 85

How does Microsoft Dynamics GP define a business object?

- A - Any window in Microsoft Dynamics GP
- B - Any window in Microsoft Dynamics GP where data can be entered or saved
- C - Any table in Microsoft SQL used by Microsoft Dynamics GP
- D - Any table group in Microsoft SQL used by Microsoft Dynamics GP

Answer: B

Question: 86

Where are Path name translations are stored?

- A - In the IM.MDB
- B - In the registry on each workstation
- C - In the IM.dic on each workstation
- D - In the Dynamics.dic on each workstation

Answer: B

Question: 87

Which of the following are sources for the Great Plains Standard Adapter? Choose the 2 that apply.

- A - XML
- B - Fixed width file
- C - Simple ODBC
- D - Excel 5,0 or higher file

Answer: A, C

Exam Name:	GP 9.0 Integration Manager VBA		
Exam Type:	Microsoft		
Exam Code:	MB3-462	Total Questions:	150

Question: 88

Which of the following are characteristics of a field marked as a key field in the source properties window?

- A - The values in the field must be unique in the source tile
- B - Only fields marked as key fields can be mapped to ID fields
- C - Must be defined as the relationship between sources
- D - Are for informational purposes only

Answer: D

Question: 89

VB scripts can be attached at which of the following levels? Choose the 3 that apply.

- A - Integration Level
- B - Field Level
- C - Translation Level
- D - Source Level

Answer: A, B, D

Question: 90

Which of the following setup destinations are available to integrate into with the Great Plains Standard Adapter?

- A - Tax Details
- B - Exchange Rate
- C - Shipping Methods
- D - Payment Terms

Answer: B

Question: 91

If you attempting to perform a Sales Order Processing transaction integration with Integration Manager, which of the following would not be a selection available when adding a source?

- A - XML
- B - VBScript
- C - ODBC
- D - Text

Answer: B

Question: 92

With Integration Manager, you have the ability to do which of the following using XML? Choose the 3 that apply.

- A - Integrate into an Microsoft Dynamics GP destination from an XML source
- B - Integrate into an XML destination from a tab delimited source
- C - Pass information from Microsoft Dynamics GP to XML
- D - XML is not an option with Integration Manager

Answer: A, B, C

Exam Name:	GP 9.0 Integration Manager VBA		
Exam Type:	Microsoft		
Exam Code:	MB3-462	Total Questions:	150

Question: 93

Which source type limits the integration to one source?

- A - XML
- B - Advanced ODBC
- C - Text File
- D - Simple ODBC

Answer: A

Question: 94

XML is an abbreviation for?

- A - Extensible Markup Language
- B - External Markup Language
- C - External Migration Language
- D - Extensible Media Language

Answer: A

Question: 95

What can the Direct to Table Document Definition Editor be used for? Choose the 3 that apply.

- A - Synchronize fields with Dexterity
- B - Create new recordsets
- C - Move fields between recordsets
- D - Change field properties

Answer: B, C, D

Question: 96

Which of the following should be done when troubleshooting a problematic SQL Server connection when using the SQL Optimized Adapter? Choose the 3 that apply.

- A - Verify the SQL Server is running.
- B - Be sure that the user specified in the destination settings has correct security to add to the table
- C - Confirm the login and password are correct for the SQL Server.
- D - Make sure that Microsoft Dynamics GP is running.

Answer: A, B, C

Question: 97

Which of the following represent the elements of a custom destination? Choose the 3 that apply.

- A - Name/DSN
- B - Root Recordset
- C - Business Object
- D - Child Recordsets

Answer: A, B, D

Question: 98

When creating a custom destination, which statements are true regarding, the "Synchronize Fields with Dexterity" option? Choose the 2 that apply.

Exam Name:	GP 9.0 Integration Manager VBA		
Exam Type:	Microsoft		
Exam Code:	MB3-462	Total Questions:	150

- A - Must be performed when Microsoft Dynamics GP is open
- B - Must be performed when Microsoft Dynamics GP is closed
- C - Is Not Required
- D - Is Required

Answer: A, C

Question: 99

Which statement is true, once an XML destination has been created?

- A - It can be reused with any source
- B - It can be reused with an identical source only
- C - It can be reused with a text source only
- D - It cannot be reused

Answer: A

Question: 100

What can you do using the XML Source Properties window? Choose the 2 that apply.

- A - Add child recordsets
- B - Add text file sources
- C - Add new fields
- D - Change the XML source file

Answer: A, C

Question: 101

What file formats does Import Utility support? Choose the 2 that apply.

- A - Tab Delimited file
- B - SQL database
- C - Comma Delimited file
- D - All of the Above

Answer: A, C

Question: 102

What is a non-window field?

- A - A field that appears on a window, but cannot be changed
- B - A field that is stored in a table, but does not appear on a window
- C - A field that is not required
- D - A drop down list field

Answer: B

Question: 103

Which of the follow circumstances will always cause Import Utility to reject records?

- A - Field values exceed the maximum field length
- B - The source file contains column headings
- C - Records are duplicates of records that already exist in the table
- D - Key fields are in lowercase

Exam Name:	GP 9.0 Integration Manager VBA		
Exam Type:	Microsoft		
Exam Code:	MB3-462	Total Questions:	150

Answer: C

Question: 104

When using the Import Utility, what will happen to invalid data types?

- A - Rejected
- B - Converted and truncated
- C - Ignored
- D - Translated based on your setup

Answer: B

Question: 105

Which of the following types of tables are NOT recommended as an import destination with Import Utility? Choose the 2 that apply.

- A - Open Tables
- B - Work Tables
- C - History Tables
- D - Master Tables

Answer: A, C

Question: 106

When importing General Journal Transactions with Import Utility, which tables would be required? Choose the 2 that apply.

- A - GL00100, Account Master
- B - GL10000, Transaction Work
- C - GL10001 Transaction Amounts Work
- D - GL00105, Account Index Master

Answer: B, C

Question: 107

Cash Receipts are being integrated and applied to Invoices. When looking at the Apply Sales Document window, nothing is applied. What should be checked to resolve this? Choose the 3 that apply.

- A - The invoices (or debit documents) must be unposted, and saved to batches.
- B - In the Destination Mapping, click on the Cash Apply collection and then the Options tab. Check to make sure the Rule column is marked to Use Source Recordset.
- C - The invoices (or debit documents) must be posted
- D - The invoices (or debit documents) must be sitting in the RM Open table

Answer: B, C, D

Question: 108

Which script event is the last to run when an integration is run?

- A - After Document script
- B - After Integration script
- C - After Source script
- D - Field level script

Exam Name:	GP 9.0 Integration Manager VBA		
Exam Type:	Microsoft		
Exam Code:	MB3-462	Total Questions:	150

Answer: C

Question: 109

What is NOT one of the benefits of using the Integration Manager Great Plains Standard Adapter?

- A - Data is validated before entering the system
- B - You can integrate into any destination
- C - You can update Master tables
- D - Data can be filtered or restricted before integrating

Answer: B

Question: 110

Which of the following is not a Great Plains Standard Adapter?

- A - Currency Accounts
- B - Variable Allocation Accounts
- C - Unit Accounts
- D - Payroll Manual Checks

Answer: A

Question: 111

A Payables Transaction integration has been created. It is based on one source file that includes debit and credit distributions. When run, only one distribution account is integrated. What should be checked to resolve this problem? Choose the S that apply.

- A - Two source queries are required: One for transaction information and one for distribution information.
- B - The transaction information source query must be sorted by the same field used in the query relationship.
- C - The relationship between the source queries needs to be pointing from the transaction(header) source query to the distribution(detail) source query.
- D - In the Destination Mapping, click on the Entries collection and then the Options tab. Check to make sure the Source column is referencing detail source query and not the header source query.

Answer: A, C, D

Question: 112

When integrating Customers, what are the available Destination Edit Modes? Choose the 3 that apply.

- A - Insert Only
- B - Update Only
- C - Insert and Update
- D - Update Existing Records Only

Answer: A, B, C

Question: 113

Which of the following can be specified for the Log Level of detail? Choose the 2 that apply.

Exam Name:	GP 9.0 Integration Manager VBA		
Exam Type:	Microsoft		
Exam Code:	MB3-462	Total Questions:	150

- A - Database
- B - File
- C - None
- D - Trace

Answer: C, D

Question: 114

Each field that has their Field Rule set to "Use Source Field" will display additional settings under the Rule Properties section. The settings include which of the following options? Choose the 3 that apply.

- A - Translation
- B - Use System Date
- C - If Null
- D - Case Conversion

Answer: A, C, D

Question: 115

How can you preview a Source?

- A - Open the source properties window and go to the Sorting tab
- B - Open the source properties window and go to the Columns tab
- C - Right click on the source name
- D - Go into the Object Browser

Answer: C

Question: 116

Which of the following sources will allow Integration Manager to create a rejection file?

- A - Simple ODBC Source
- B - XML Source
- C - Text Source
- D - Advanced ODBC Source

Answer: C

Question: 117

What is updated when Integration Manager is installed, and Microsoft Dynamics GP is launched?

- A - Dynamics. set
- B - IM.MDB
- C - All of the above
- D - None of the above

Answer: A

Question: 118

Where are Path name translations are stored?

- A - In the IM.MDB
- B - In the registry on each workstation
- C - In the IM.dic on each workstation

Exam Name:	GP 9.0 Integration Manager VBA		
Exam Type:	Microsoft		
Exam Code:	MB3-462	Total Questions:	150

D - In the Dynamics.dic on each workstation

Answer: B

Question: 119

What is a key difference between the Simple ODBC and Advanced ODBC source?

- A - Simple ODBC can only pull data from Excel spreadsheets
- B - Advanced ODBC can only be used by the 'sa' user
- C - Simple ODBC must be the only source on an integration
- D - Advanced ODBC requires a SQL statement to be written

Answer: D

Question: 120

When Integration Manager is installed, what is checked?

- A - Minimum Microsoft Dynamics GP version is checked
- B - Minimum system requirements are checked
- C - None of the above
- D - All of the above

Answer: B

Question: 121

Which of the following statements are true regarding Integration Manager? Choose the 2 that apply.

- A - Data can be translated
- B - Data can be integrated from ODBC compliant sources
- C - Required fields cannot be defaulted for any sources
- D - No data validation is performed for any destinations

Answer: A, B

Question: 122

A key difference between local and global translations is? Choose the 2 that apply.

- A - Local translations cannot be changed
- B - Local translations can only be used on the field and integration where they are created
- C - Global translations can be used on multiple integrations
- D - Global translations can only be used on integrations with the same destination

Answer: B, C

Question: 123

How does Microsoft Dynamics GP define a business object?

- A - Any window in Microsoft Dynamics GP
- B - Any window in Microsoft Dynamics GP where data can be entered or saved
- C - Any table in Microsoft SQL used by Microsoft Dynamics GP
- D - Any table group in Microsoft SQL used by Microsoft Dynamics GP

Answer: B

Exam Name:	GP 9.0 Integration Manager VBA		
Exam Type:	Microsoft		
Exam Code:	MB3-462	Total Questions:	150

Question: 124

Which of the following is NOT available as a rule in the option tab for the entries section of the General Ledger transaction destination mapping window?

- A - Use Default
- B - Default Non-Imported
- C - Use Source Recordset
- D - Empty

Answer: B

Question: 125

Which of the following are characteristics of a field marked as a key field in the source properties window?

- A - The values in the field must be unique in the source file
- B - Only fields marked as key fields can be mapped to ID fields
- C - Must be defined as the relationship between sources
- D - Are for informational purposes only

Answer: D

Question: 126

Which of the following Master records can be updated with the Great Plains Standard Adapter? Choose the 3 that apply.

- A - Fixed Allocation Accounts
- B - Unit Accounts
- C - Item Resource Planning Maintenance
- D - Customers

Answer: A, B, D

Question: 127

What is the default value for maximum number of errors Integration Manager allows before the integration is stopped?

- A - 1
- B - 5
- C - 10
- D - 25

Answer: C

Question: 128

You have one source file. In order to integrate a journal entry into the General Ledger, what must you specify in the header source so that each row isn't brought over as a separate journal entry?

- A - Order by on the column that is the same value for each row
- B - Group by on the column that is the same value for each row
- C - Check the s Key box on the column that is the same value for each row
- D - Set the datatype of the Journal Entry number as String

Answer: B

Exam Name:	GP 9.0 Integration Manager VBA		
Exam Type:	Microsoft		
Exam Code:	MB3-462	Total Questions:	150

Question: 129

If an integration has more than one source query, which statement is true?

- A - A relationship between the sources is optional
- B - There must be more than one source file
- C - A relationship must be defined between the sources
- D - Both source queries must be the same type

Answer: C

Question: 130

Which of the following destinations are available with the Great Plains Standard Adapter? Choose the 2 that apply.

- A - Bank Reconcile
- B - Purchase Order Transaction
- C - Invoicing Transaction
- D - Unit Accounts

Answer: A, D

Question: 131

Which of the following is an available Storage Type for the Integration Log? Choose the 2 that apply.

- A - File
- B - Database
- C - Spreadsheet
- D - XML

Answer: A, B

Question: 132

Before running an integration with the Great Plains Standard Adapter, do you have to be logged into the Microsoft Dynamics GP company you would like to integrate to?

- A - Yes
- B - No, it integrates into the last company that was logged into
- C - No, you specify the company in the integration
- D - No, the integration properties include a company database setting

Answer: A

Question: 133

If the user wishes to only integrate transactions for a certain date, what would be the best way to limit the data?

- A - Local Translation
- B - Global Translation
- C - Row Restriction
- D - Order By

Answer: C

Question: 134

Page 26 of 30	© SelfExamEngine.com
---------------	----------------------

Exam Name:	GP 9.0 Integration Manager VBA		
Exam Type:	Microsoft		
Exam Code:	MB3-462	Total Questions:	150

What fields are required, or do not have the option to use default, when running a GL Accounts integration?

- A - Account Number, Description, Posting Type
- B - Account Number, Category, Posting Type
- C - Account Number, Description, Category
- D - Account Number, Category, Typical Balance

Answer: C

Question: 135

What is the default Relationship Type?

- A - There can be 0 or 1 record in the child for each record in the master
- B - There must be exactly 1 record in the child for each record in the master
- C - There can be 0 or more records in the child for each record in the master
- D - There must be at least 1 record in the child for each record in the master

Answer: C

Question: 136

When creating a Simple ODBC query to access an Excel spreadsheet, what step must be done in Excel in order to see the data?

- A. Give the spreadsheet a name that matches the query name
- B - Define a named range within the spreadsheet
- C - Format the spreadsheet as a "general" format
- D - The first Excel row must have column names

Answer: B

Question: 137

Which of the following setup destinations are available to integrate into with the Great Plains Standard Adapter?

- A - Tax Details
- B - Exchange Rate
- C - Shipping Methods
- D - Payment Terms

Answer: B

Question: 138

How many queries are required when creating an accounts integration with one source file?

- A - 0
- B - 1
- C - 2
- D - 3

Answer: B

Question: 139

Data types can be changed within Integration Manager for which source type? Choose the 2 that apply.

Exam Name:	GP 9.0 Integration Manager VBA		
Exam Type:	Microsoft		
Exam Code:	MB3-462	Total Questions:	150

- A - Simple ODBC source
- B - Advanced ODBC source
- C - Text source
- D - All of the above

Answer: B, C

Question: 140

Which of the following are sources for the Great Plains Standard Adapter? Choose the 2 that apply.

- A - XML
- B - Fixed width file
- C - Simple ODBC
- D - Excel 5.0 or higher file

Answer: A, C

Question: 141

Which of the following should be done when troubleshooting a problematic SQL Server connection when using the SQL Optimized Adapter? Choose the 3 that apply.

- A - Verify the SQL Server is running.
- B - Be sure that the user specified in the destination settings has correct security to add to the table
- C - Confirm the login and password are correct for the SQL Server.
- D - Make sure that Microsoft Dynamics GP is running.

Answer: A, B, C

Question: 142

Custom destinations can be created using?

- A - Only one table
- B - Multiple tables
- C - A maximum of two tables
- D - Only transaction tables

Answer: B

Question: 143

With the XML Source Adapter, after you select the XML data file you wish to import from, the Source Settings window appears. The Source Settings window contains which of the following settings? Choose the 3 that apply.

- A - The File path
- B - Filter
- C - Use Filter
- D - Password

Answer: A, B, C

Question: 144

Exam Name:	GP 9.0 Integration Manager VBA		
Exam Type:	Microsoft		
Exam Code:	MB3-462	Total Questions:	150

How do you change the company to which records are going to be integrated when using the SQL Optimized Adapter?

- A - Change only the Company Database on the Destination Settings of the integration.
- B - Change only the Company that you are logged into when the integration is running.
- C - Change both the Company Database on the Destination Settings and the Company that you are logged into.
- D - It is not possible to change the company for an existing integration. A new integration would have to be created.

Answer: A

Question: 145

XML is an abbreviation for?

- A - Extensible Markup Language
- B - External Markup Language
- C - External Migration Language
- D - Extensible Media Language

Answer: A

Question: 146

Which of the following resources are recommended when creating a Custom Destination? Choose the 3 that apply.

- A - Database Diagrams
- B - Resource Descriptions in Microsoft Dynamics GP
- C - Microsoft Dynamics GP Report Writer
- D - Microsoft SQL Query Angler

Answer: A, B, D

Question: 147

What can you do using the XML Source Properties window? Choose the 2 that apply.

- A - Add child recordsets
- B - Add text file sources
- C - Add new fields
- D - Change the XML source file

Answer: A, C

Question: 148

Which of the following destinations are only available using the SQL Optimized Adapter? Choose the 3 that apply.

- A - Sales Order
- B - Purchase Order
- C - Receivings Transaction Entry
- D - Shipping Methods

Answer: B, C, D

Question: 149

Exam Name:	GP 9.0 Integration Manager VBA		
Exam Type:	Microsoft		
Exam Code:	MB3-462	Total Questions:	150

There are limitations to the Receivings Transaction integration using the SQL Optimized Adapter. Which of the following is NOT a limitation?

- A - Multicurrency transactions are not supported.
- B - Vendor Summary information is not updated automatically during an integration.
- C - Sales Document Commitments are not supported
- D - Shipment/Invoice document types cannot be entered

Answer: D

Question: 150

Which of the following is NOT true regarding the SQL Optimized Adapter?

- A - General Ledger Transactions can be integrated
- B - New records can be inserted
- C - Existing records can be updated
- D - General Ledger Accounts can be integrated

Answer: C
