**MCSE, CCNA, CCNP, OCP, CIW, JAVA, Sun Solaris, Checkpoint
World No 1 Cert Exams**

MB3-530

Congratulations!

You have purchased a TestKingprep.com Study Guide.

This study guide is a complete collection of questions and answers that have been developed by our professional & certified team. You must study the contents of this guide properly in order to prepare for the actual certification test. The average time that we would suggest you for studying this study guide is approximately 10 to 20 hours and you will surely pass your exam. We guarantee it!

GOOD LUCK!

DISCLAIMER

Question: 1

You have created an integration using eConnect. What must be installed to use the integration in a production environment?

- A. eConnect full version
- B. eConnect runtime version
- C. Integration Manager
- D. Nothing

Answer: B

Question: 2

Where are the business objects that perform data validation and provide the business logic used by eConnect stored?

- A. Microsoft Dynamics GP application dictionary
- B. eConnect application dictionary
- C. SQL Tables
- D. SQL Stored Procedures

Answer: D

Question: 3

Which of the following statements is true regarding Integration Manager?

- A. No knowledge of Microsoft Dynamics GP is required
- B. No programming knowledge is required
- C. Does not require licensing
- D. Does not allow for scripting

Answer: B

Question: 4

What are the components of Integration Manager? Choose the 3 that apply.

- A. Source Adapters
- B. Destination Adapters
- C. Web services
- D. Integration Manager Engine

Answer: A, B, D

Question: 5

Which of the following statements is false regarding Import Utility?

- A. Imports data into any Microsoft Dynamics GP table
- B. Integrates at the database level
- C. Performs data validation by applying business logic
- D. Converts data to valid field types

Answer: C

Question: 6

Which of the following database integration tools has built in data validation? Choose the 3 that apply.

- A. eConnect
- B. Web Services for Microsoft Dynamics GP
- C. Integration Manager
- D. Dexterity

Answer: A, B, C

Question: 7

Which development tools use eConnect functionality? Choose the 2 that apply.

- A. Extender
- B. Import Utility
- C. Integration Manager
- D. Web Services for Microsoft Dynamics GP

Answer: C, D

Question: 8

What is a non-window field?

- A. A field that appears on a window, but cannot be changed
- B. A field that is stored in a table, but does not appear on a window
- C. A field that is not required
- D. A drop-down list field

Answer: B

Question: 9

Which of the follow circumstances always causes Import Utility to reject records?

- A. Field values exceed the maximum field length
- B. The source file contains column headings
- C. Records are duplicates of records already in the table
- D. Key fields are in lowercase

Answer: C

Question: 10

Which of the following is a resource to use when creating an import with Import Utility? Choose the 3 that apply.

- A. Microsoft Dynamics GP Database Diagrams
- B. Microsoft Dynamics GP Resource Descriptions
- C. Microsoft SQL Server Management Studio
- D. Microsoft SQL Server Books Online

Answer: A, B, C

Question: 11

What two sets of tables contain the Import Definitions for Import Utility? Choose the 2 that apply.

- A. SY50000.idx and SY50000.dat
- B. SY50100.idx and SY50100.dat
- C. SY60000.idx and SY60000.dat

D. SY50001.idx and SY50001.dat

Answer: A, B

Question: 12

What file formats does Import Utility support? Choose the 2 that apply.

- A. Tab Delimited file
- B. SQL database
- C. Comma Delimited file
- D. All of the Above

Answer: A, C

Question: 13

Which of the following actions can be performed by using Import Utility?

- A. Insert New Records
- B. Update Existing Records
- C. Both Insert and Update
- D. Delete records

Answer: A

Question: 14

When using Import Utility, what happens to invalid data types when they are encountered?

- A. Rejected
- B. Converted
- C. Ignored
- D. Translated based on your setup

Answer: B

Question: 15

Which of the following types of tables are not recommended as an import destination when using Import Utility? Choose the 2 that apply.

- A. Open Tables
- B. Work Tables
- C. History Tables
- D. Master Tables

Answer: A, C

Question: 16

Integration manager can import data in to which of the following?

- A. Standard and Modified Microsoft Dynamics GP windows
- B. Standard Microsoft Dynamics GP windows only
- C. Standard Microsoft Dynamics GP and third party application windows
- D. Standard, Modified, and third party application windows

Answer: B

Question: 17

To run an integration from within Microsoft Dynamics GP, a user must have access to which of the following security operations?

- A. Integration Site Enabler
- B. Integration Manager
- C. Integration Tools
- D. No security is required, security is set at the integration level

Answer: A

Question: 18

What is a key reason for selecting an eConnect destination adapter instead of a Microsoft Dynamics GP adapter destination?

- A. Ability to integrate based on a schedule
- B. Potential for better performance with large volumes of data
- C. Ability to default required fields
- D. Better data validation

Answer: B

Question: 19

Where are Integration Manager registration keys entered?

- A. On the server only
- B. On every workstation
- C. On the first workstation only
- D. In Microsoft Dynamics GP

Answer: B

Question: 20

The IM Registration Utility is found in what location?

- A. In the Integration Manager installation directory
- B. Within the Integration Manager application
- C. In the Microsoft Dynamics GP installation directory
- D. Within Microsoft Dynamics GP Utilities

Answer: A

Question: 21

You have been asked to create a new integration database for testing purposes; where can the new database be created?

- A. Microsoft Dynamics GP Utilities
- B. Microsoft Dynamics GP
- C. Integration Manager
- D. SQL Management Studio

Answer: C

Question: 22

The first time Integration Manager is started, which of the following must be done?

- A. Locate the Integration Manager database file
- B. Register Integration Manager
- C. Start Microsoft Dynamics GP
- D. Start Microsoft Dynamics GP Utilities

Answer: B

Question: 23

When creating a command line integration, which of the following is a security consideration?

- A. The 'sa' user must be used for command line integrations
- B. The user must be a SQL administrator for command line integrations
- C. The user name and password displays in the login macro file
- D. The user name and password displays in the launch .bat file

Answer: C

Question: 24

Which of the following Integration Manager techniques can be used to ensure that source data values match Microsoft Dynamics GP values?

- A. Update
- B. Translations
- C. Restrictions
- D. Transformations

Answer: B

Question: 25

Which of the following are prerequisites to install the Microsoft Dynamics GP destination adapter for Integration Manager? Choose the 2 that apply.

- A. Microsoft SQL Server 2005
- B. Microsoft Dynamics GP
- C. User must have full, local administrative rights
- D. User must be a Microsoft Dynamics GP user

Answer: B, C

Question: 26

Integration Manager databases can be stored as two different file types. What are they? Choose the 2 that apply.

- A. .MDB
- B. .XML
- C. .IMD
- D. .DIC

Answer: A, C

Question: 27

In addition to displaying Integration Manager version information, the About Microsoft Dynamics GP Integration Manager window also displays which of the following?

- A. Current users
- B. Registration keys
- C. Microsoft Dynamics GP version information
- D. Source and destination adapter information

Answer: D

Question: 28

Keys stored in an integrationmanager.ini file on a specific workstation will do which of the following?

- A. Be used if no keys exist in the registry
- B. Be used if selected as the primary keys
- C. Override the keys in the registry
- D. Be overridden by keys in the registry

Answer: D

Question: 29

What kind of security privileges are required to run an integration?

- A. Administrator privileges on the workstation
- B. Domain administrator privileges
- C. SQL administrator privileges
- D. No special privileges are necessary

Answer: A

Question: 30

When planning an integration and identifying the source information, which of the following should be considered? Choose the 2 that apply.

- A. Volume of records to be integrated
- B. Preferred destination type
- C. Possible formats for the source file
- D. Number of fields to be integrated

Answer: A, C

Question: 31

The Integration Manager database conversion process creates which of the following files?

- A. A converted database only
- B. A log file only
- C. A converted database and log file
- D. No files are created as part of the process

Answer: C

Question: 32

The IM Registration Utility creates which of the following files?

- A. IMReg.sql
- B. IMReg.xml
- C. IM.sql

D. IM.xml

Answer: B

Question: 33

You recently upgraded Microsoft Dynamics GP and Integration Manager. What happens to integrations during the upgrade process?

- A. The integrations are upgraded automatically as part of the Microsoft Dynamics GP upgrade process
- B. The integration database must be upgraded using the Integration Manager Database Conversion window
- C. No upgrade is necessary; all integrations can be automatically used in the new version
- D. No upgrade is possible; all integrations must be recreated

Answer: B

Question: 34

The Integration Manager installation can be repaired using Add/Remove Programs in Control Panel or by using which of the following methods?

- A. Using Microsoft Dynamics GP Utilities
- B. Using Integration Manager Utilities
- C. Selecting Integration Manager from Microsoft Dynamics GP CD 2
- D. Integration Manager can only be repaired from Add/Remove Programs in Control Panel

Answer: C

Question: 35

Integrations created in Integration Manager can be customized by using which of the following?

- A. Modifier
- B. Visual Studio
- C. .Net
- D. VBScripting

Answer: D

Question: 36

Your company has specified a password to exceed credit limits in Receivables Management. When creating a Receivables Transaction integration, which of the following security concerns should you consider?

- A. The password is not used, and all transactions integrate
- B. The password must be entered manually by the user running the integration
- C. The password is entered in destination mapping
- D. There are no security considerations in this example

Answer: C

Question: 37

When the eConnect destination adapter for Integration Manager is installed, what type of eConnect installation is installed?

- A. Runtime

- B. Full
- C. Integration
- D. None

Answer: A

Question: 38

Which of the following components make up the Integration Manager workspace? Choose the 2 that apply.

- A. Menu
- B. Toolbar
- C. Navigation Pane
- D. Ribbon

Answer: A, B

Question: 39

When installing the eConnect destination adapter for Integration Manager, the specified eConnect user specified must be part of which database role?

- A. db_owner
- B. DYNGRP
- C. db_datawriter
- D. DYNWORKFLOWGRP

Answer: B

Question: 40

A simple ODBC source allows for which of the following?

- A. Connection to a single table or view
- B. Connection using a SQL statement
- C. Connection to multiple tables or views
- D. Connection without a data source defined

Answer: A

Question: 41

When creating an integration group, which of the following options are available? Choose the 2 that apply.

- A. If document errors, skip document
- B. If document errors, continue group
- C. If integration failed, stop group
- D. If integration failed, skip integration

Answer: B, C

Question: 42

Which of the following is an available Storage Type for the Integration Log? Choose the 2 that apply.

- A. File
- B. Database

- C. Spreadsheet
- D. XML

Answer: A, B

Question: 43

Data types can be changed within Integration Manager for which source type? Choose the 2 that apply.

- A. Simple ODBC source
- B. Advanced ODBC source
- C. Text source
- D. All of the above

Answer: B, C

Question: 44

What is the best way to limit the data to be integrated to a specific date?

- A. Local Translation
- B. Global Translation
- C. Filter Restriction
- D. Order By

Answer: C

Question: 45

When does the Destination Edit Mode field become available in the Integration Properties window?

- A. When the integration is saved
- B. When the destination is mapped
- C. When a destination is added
- D. When a source is added

Answer: C

Question: 46

As a Technical Support Engineer, you have been asked to create a Sales Order Processing integration. Since there is significant transaction volume each day, you decide to use the eConnect destination adapter in an effort to increase performance. What information do you need to define the destination settings? Choose the 2 that apply.

- A. DSN
- B. Password
- C. Database ID
- D. SQL Server Name

Answer: C, D

Question: 47

Where can you change the maximum number of errors and warnings?

- A. In the Relationships window
- B. In the Source Properties window

- C. In the Object Browser window
- D. In the Integration Properties window

Answer: D

Question: 48

Which of the following are characteristics of a field marked as a key field in the source properties window?

- A. The values in the field must be unique in the source file
- B. Only fields marked as key fields can be mapped to ID fields
- C. Must be defined as the relationship between sources
- D. Must be marked to Show

Answer: D

Question: 49

In Integration Manager, what is the definition of a root recordset?

- A. The recordset with only one record per parent
- B. The recordset represented by the cylinder icon
- C. The recordset with the most key fields
- D. The recordset at the top level of the destination

Answer: D

Question: 50

Which of the following statements is true regarding sources in Integration Manager?

- A. A specific source can be used on more than one integration
- B. A specific source can only be used on one integration
- C. Sources are deleted when an integration is deleted
- D. Sources are user specific

Answer: A

Question: 51

If an integration has more than one source query, which of the following statements is true?

- A. A relationship between the sources is optional
- B. There must be more than one source file
- C. A relationship must be defined between the sources
- D. Both source queries must be the same type

Answer: C

Question: 52

What is the default value for the maximum number of errors allowed before the integration is stopped by Integration Manager?

- A. 1
- B. 5
- C. 10
- D. 25

Answer: C

Question: 53

Integration Manager can add a Batch ID for a transaction integration. On the Options tab of the Destination Mapping window, which selection must be made?

- A. Set Create New Batch equal to True
- B. Set Create New Batch equal to Yes
- C. Set Add New Batch equal to True
- D. Set Missing Batch equal to Add New Batch

Answer: D

Question: 54

Which integration log level is recommended for debugging an integration?

- A. Document
- B. Trace
- C. Step
- D. None

Answer: B

Question: 55

If you do not select first Row Contains Column Names in the Source properties, what default names are assigned?

- A. Column1, Column2, Column3, and so on
- B. Name1, Name2, Name3, and so on
- C. F1, F2, F3, and so on
- D. None of the Above

Answer: C

Question: 56

Before running an integration with the Microsoft Dynamics GP Destination Adapter, are you required to be logged into the Microsoft Dynamics GP company you would like to integrate to?

- A. Yes
- B. No, it integrates into the last company that was logged into
- C. No, you specify the company in the integration
- D. No, the integration properties include a company database setting

Answer: A

Question: 57

How does Microsoft Dynamics GP define a business object?

- A. The window included in a destination
- B. A combination of the logic and tables included in a destination
- C. Any table in Microsoft SQL used by Microsoft Dynamics GP
- D. Any table group in Microsoft SQL used by Microsoft Dynamics GP

Answer: B

Question: 58

How do you change the company to which records integrate when using the eConnect destination adapter

- A. Change only the Company Database in the Destination Settings window of the integration.
- B. Change only the company that you are logged into in Microsoft Dynamics GP when the integration is running.
- C. Change both the Company Database in the Destination Settings and the company that you are logged into in Microsoft Dynamics GP.
- D. It is not possible to change the company for an existing integration. A new integration must be created.

Answer: A

Question: 59

How can you preview a Source file?

- A. Open the source properties window and go to the Sorting tab
- B. Open the source properties window and go to the Columns tab
- C. Right click on the source name
- D. Go into the Object Browser

Answer: C

Question: 60

Which of the following destination adapters apply business logic when integrating data?

- A. Import Utility
- B. Microsoft Dynamics GP Destination Adapters Only
- C. eConnect Destination Adapters Only
- D. Both Microsoft Dynamics GP and eConnect Destination Adapters

Answer: D

Question: 61

How does Integration Manager determine the data type for source fields?

- A. Prompts user to define
- B. Reads metadata of source to determine data type
- C. Guesses based on field content
- D. It does not make a determination, data types must be manually entered for all fields

Answer: C

Question: 62

Which of the following sources allow Integration Manager to create a rejection file?

- A. Simple ODBC Source
- B. SQL Source
- C. Text Source
- D. Advanced ODBC Source

Answer: C

Question: 63

Where are Pathname translations stored?

- A. In the IM.IMD
- B. In the registry on each workstation
- C. In the IM.dic on each workstation
- D. In the Dynamics.dic on each workstation

Answer: B

Question: 64

What is a key difference between the Simple ODBC and Advanced ODBC sources?

- A. Simple ODBC can only pull data from Excel spreadsheets
- B. Advanced ODBC can only be used by the 'sa' user
- C. Simple ODBC must be the only source on an integration
- D. Advanced ODBC requires a SQL statement to be written

Answer: D

Question: 65

When an integration is deleted, which of the following items are not deleted at the same time? Choose the 2 that apply.

- A. Sources Queries
- B. Data Sources
- C. Query Relationships
- D. Destination Mappings

Answer: A, B

Question: 66

What is the default Relationship Type?

- A. There can be 0 or 1 record in the child for each record in the master
- B. There must be exactly 1 record in the child for each record in the master
- C. There can be 0 or more records in the child for each record in the master
- D. There must be at least 1 record in the child for each record in the master

Answer: C

Question: 67

What is a key difference between local and global translations? Choose the 2 that apply.

- A. Local translations cannot be changed
- B. Local translations can only be used on the field and integration where they are created
- C. Global translations can be used on multiple integrations
- D. Global translations can only be used on integrations with the same destination

Answer: B, C

Question: 68

When creating a Simple ODBC query to access an Excel spreadsheet, what step must be done in Excel to integrate the data?

- A. Give the spreadsheet a name that matches the query name

- B. Define a named range within the spreadsheet
- C. Format the spreadsheet as a general format
- D. The first Excel row must have column names

Answer: B

Question: 69

Which of the following types of translations can be created? Choose the 2 that apply.

- A. Universal Translation
- B. Global Translation
- C. Local Translation
- D. Fixed Translation

Answer: B, C

Question: 70

What happens when an integration that contains older destination or source adapters is opened?

- A. It automatically upgrades, regardless of Integration Manager settings.
- B. It automatically upgrades, unless "Do Not Automatically Upgrade Sources and Destinations" is selected.
- C. It never automatically upgrades; the Database Conversion must be run.
- D. It never automatically upgrades; the adapters must be manually upgraded in Microsoft Access.

Answer: C

Question: 71

Which of the following actions are required steps to schedule an integration? Choose the 3 that apply.

- A. Create a Microsoft Dynamics GP Login Macro
- B. Create a .BAT file to run an integration
- C. Create a macro to log out of Microsoft Dynamics GP
- D. Create a .BAT file to start Microsoft Dynamics GP

Answer: A, B, D

Question: 72

Where are data sources created in Integration Manager stored?

- A. On the workstation where they were created
- B. On the SQL Server
- C. In the Integration Database
- D. In the location specified when they are created

Answer: C

Question: 73

Where can data sources for Integration Manager be created?

- A. In Integration Manager only
- B. In Control Panel only
- C. In either Integration Manager or Control Panel

D. Only the data source created when Microsoft Dynamics GP is installed can be used in Integration Manager

Answer: C

Question: 74

The following are a list of several VBScripting events. Which selection lists the events in the correct order?

- A. Before Integration, Before Source, After Source, After Integration
- B. Before Source, Before Integration, After Source, After Integration
- C. Before Source, Before Integration, After Integration, After Source
- D. Before Integration, Before Source, After Integration, After Source

Answer: D

Question: 75

VB scripts can be attached at which of the following levels? Choose the 3 that apply.

- A. Integration Level
- B. Field Level
- C. Translation Level
- D. Query/Source Level

Answer: A, B, D

End of the Document
