Question: 1

What program do you use to set up SQL back up jobs?

- A. SQL Profiler
- B. Microsoft Dynamics SL Database Maintenance
- C. SQL Server Management Studio
- D. Service Manager

Answer: C

Question: 2

Microsoft Dynamics SL's access security functions include which of the following? Choose the 3 that apply.

- A. Controlling who can and cannot log into Microsoft Dynamics SL.
- B. Enabling and disabling Microsoft Access database security functions.
- C. Identifying database users and groups.
- D. Controlling who does and does not have access rights to certain Microsoft Dynamics SL windows.

Answer: A, C, D

Question: 3

What is the primary reason for installing additional servers in the Microsoft Dynamics SL hardware environment?

- A. To offload printing, email and file services from the main database server
- B. To make more hard disk storage space available
- C. To allow for duplicate data entry
- D. To provide a redundant environment that would prevent a total system failure in the event of a server crash

Answer: A

Question: 4

Which of the following statements about the Microsoft Dynamics SL System database is false?

- A. The System database contains Microsoft Dynamics SL product registrations, security settings and database field attributes.
- B. The System database does contain some accounting data.
- C. A separate System database must be created for each Application database you define.
- D. The System database eliminates the need for redundant system-level information in Application databases.

Answer: C

Question: 5

Good implementation policies recommend a "pre-installation" process. Which of the following should be included in a pre-installation process? Choose the 3 that apply.

- A. You can optionally activate Microsoft SQL Server's referential integrity capabilities to extend the referential integrity capabilities of Solomon.
- B. Protect the data of any current accounting software that Microsoft Dynamics SL is replacing.
- C. Verify adequate hardware and software resources to run Microsoft Dynamics SL..
- D. Obtain the tools and resources used before, during and after the installation of Microsoft Dynamics SL program files.

Answer: B, C, D

Question: 6

Which of the following statements about referential integrity is true?

- A. Referential integrity is programmed into Microsoft Dynamics SL application windows.
- B. Referential integrity is solely the responsibility of the Microsoft Dynamics SL System Manager module.
- C. Microsoft Dynamics SL's referential integrity functions are closely connected to the referential integrity functions provided by Microsoft SQL Server.
- D. You can optionally activate Microsoft SQL Server's referential integrity capabilities to extend the referential integrity capabilities of Microsoft Dynamics SL.

Answer: A

Question: 7

What is the purpose of Microsoft Dynamics SL's two-database design? Choose the 2 that apply.

- A. Provide data redundancy that protects the financial data in the event of a system crash.
- B. Maintain system data separately from financial data for storage and operating efficiency.
- C. Allows Microsoft Dynamics SL to distribute data evenly across databases.
- D. Permit multiple Application databases to coexist on the same computer system.

Answer: B, D

Question: 8

What is the purpose of referential Integrity?

- A. Enforces the relationship between a Microsoft Dynamics SL system database and its application databases.
- B. Enforces the relationship between database tables.
- C. Enforces the relationship between the Microsoft Dynamics SL System Manager module and all other Microsoft Dynamics SL modules.
- D. Enforces the relationship among all windows (data entry, maintenance, processing, reporting) making up a Microsoft Dynamics SL module.

Answer: B

Question: 9

When installing SQL Server to be used with Microsoft Dynamics SL, you must do which of the following? Choose the 2 that apply.

- A. Install with the default character set.
- B. Install it on the same server as Microsoft Dynamics SL.
- C. Set the sa user's password to "Master".
- D. Install with the default sort order

Answer: A, D

Question: 10

Which of the following cannot be installed from the Microsoft Dynamics SL CD(s)?

- A. Seagate Crystal Reports
- B. Microsoft Dynamics SL Tools for Visual Basic

- C. Microsoft SQL Server
- D. Microsoft Dynamics SL Kernel (SWIM)

Answer: C

Question: 11

What are good ways to optimize Microsoft Dynamics SL performance in the Windows environment on the server? Choose the 2 that apply.

- A. Decrease conventional memory as much as possible
- B. In the Systems Properties, set the Performance Options to optimize performance for Background Services
- C. Allocate more memory to SQL server
- D. In the Systems Properties, set the Performance Options to optimize performance for Application

Answer: C, D

Question: 12

Which Microsoft versions of Windows are supported for a Microsoft Dynamics SL client installation? Choose the 2 that apply.

- A. Windows Vista
- B. Windows 2003
- C. Windows XP Professional
- D. Windows 2000 Professional

Answer: A, C

Question: 13

What Microsoft Dynamics SL module must be installed and set up to allow the scheduling and off loading of processes to a designated machine?

- A. General Ledger
- B. Accounts Payable
- C. Accounts Receivable
- D. Application Server

Answer: D

Question: 14

Which of the following can increase a Microsoft Dynamics SL Application database's hard disk storage requirements? Choose the 3 that apply.

- A. The volume of transactions processed
- B. The Microsoft Dynamics SL modules being used
- C. Transaction detail retention settings
- D. Installation of application help files

Answer: A, B, C

Question: 15

Which of the following statements about Microsoft Dynamics SL databases is true?

- A. You can set up a System database and begin defining Microsoft Dynamics SL non-financial data without setting up Application databases.
- B. If you will be using multiple Application databases, Microsoft Dynamics SL requires you to identify all Application databases before beginning regular operations.
- C. You need to set up the System database and at least one Application database before beginning regular operations.
- D. You create the System database before you sign onto Microsoft Dynamics SL and then create the Application databases after you sign in.

Answer: C

Question: 16

When you start the Microsoft Dynamics SL Setup program, which action does Setup perform automatically?

- A. Shut down any other currently running Windows applications
- B. Determine whether or not the server needs a newer version of OLE
- C. Detect whether or not Microsoft SQL Server is installed and prompt you to install it if it is not
- D. Open the Welcome window on first-time installations; open the Select Solomon

Answer: B

Question: 17

Which standard Microsoft Dynamics SL application provides the ability to customize a standard report, such as the General Ledger Trial Balance?

- A. Microsoft Dynamics SL tools for Visual Basic
- B. Microsoft Dynamics SL Customization Manager
- C. FRx
- D. Crystal Reports

Answer: D

Question: 18

Standard security features in Microsoft Dynamics SL include which of the following? Choose the 3 that apply.

- A. Application screens
- B. Fields within Microsoft Dynamics SL windows
- C. Microsoft Dynamics SL modules
- D. Microsoft Dynamics SL module reports

Answer: A, C, D

Question: 19

When installing Microsoft Dynamics SL to a workstation that is running Windows XP, what account should you be logged into the computer with?

- A. Administrator
- B. Power User
- C. It does not matter for Windows XP
- D. User

Answer: A Question: 20

Which of the following would be considered an "Initialization" process as opposed to "normal operation"?

- A. Enter vouchers & adjustments
- B. Load the database with beginning balances and historical data
- C. Make a backup of the database
- D. Run Physical Database Integrity

Answer: B

Question: 21

Which of the following are true statements about Microsoft Dynamics SL product registration? Choose the 3 that apply.

- A. Microsoft Dynamics SL must be registered immediately after you install the programs and set up your first System-Application database.
- B. If the company name on the registration screen is changed, the current unlocking keys will no longer be valid.
- C. Registering Microsoft Dynamics SL does not erase or alter any of the financial data stored in a database prior to registration.
- D. If Microsoft Dynamics SL is not registered within 20 database accesses, the application automatically makes the database inaccessible.

Answer: B, C, D

Question: 22

Where does Microsoft Dynamics SL store a record of the last database that a workstation has logged into?

- A. Windows Registry
- B. PVRec.csv
- C. Sollnst.cfg
- D. Solomon.ini

Answer: D

Question: 23

What two Microsoft Dynamics SL registration keys are required?

- A. General Ledger and Accounts Payable
- B. General Ledger and System Manager
- C. System Manager, General Ledger, Accounts Payable and Accounts Receivable
- D. System Manager and FRx

Answer: B

Question: 24

What needs to be done to prepare Microsoft Dynamics SL Application database for use?

- A. Define the referential relationships between the new database's data tables.
- B. Set database's account and sub account cross references in the System database's Acctxref and SubRef tables.
- C. Perform DB Update to Import messages.csv, rptcontrol.csv, pvrec.csv.
- D. Create user logins to Solomon Application databases.

Answer: C

Question: 25

Steve has Insert rights to the Journal Transaction screen in Microsoft Dynamics SL. The Managers group has Update rights to the Journal Transaction screen in Microsoft Dynamics SL. Steve is a member of the Managers group. Which of the following is true?

- A. Steve will have Insert rights because individual user rights override group rights.
- B. Steve will have Update rights because group rights override individual rights.
- C. Steve will have no rights, because of a rights conflict.
- D. Steve is not allowed to be in a group because he has individually assigned rights.

Answer: A

Question: 26

Which is the correct order of Microsoft Dynamics SL user access rights from most to least restrictive?

- A. View, insert, update, delete, initialization
- B. View, update, insert, initialization, delete
- C. View, update, insert, delete, initialization
- D. View, update, delete, insert, initialization

Answer: C

Question: 27

How many times can you access Microsoft Dynamics SL while it is in TrialLoc mode before the system will require registration keys to continue using the product?

- A. 25
- B. 20
- C. 10
- D. 5

Answer: B

Question: 28

Which of the following is true of Microsoft Dynamics SL's multi-item copy and paste functions? Choose the 2 that apply.

- A. The multi-item selection can only be copied from an existing record to a new record in the same Microsoft Dynamics SL window.
- B. Multi-items selected and copied in a random pattern must be pasted into their destination using the reverse of the random pattern.
- C. If the copying order of a multi-item selection is sequential, the pasting order does not have to be specified as long as the destination is using the same sequential order.
- D. Multi-item selections do not include system calculated items.

Answer: C, D

Question: 29

If a module's logical integrity check reports an error, what options do you have to correct it?

- A. Manually change the data table
- B. Rewrite the record to match the contents of the data file
- C. Add another record

D. Re-execute the module's integrity check, running the correct or re-build option

Answer: D

Question: 30

Which of the following statements are true with regard to backing-up Microsoft Dynamics SL program and data files? Choose the 3 that apply.

- A. The System and the Application databases should be backed-up on a daily basis..
- B. The Dynamics SL\Usr_Rpts directory should be backed-up whenever a report is customized.
- C. Program files can be backed-up but it is not absolutely necessary as they may also be reinstalled from the CD-ROM.
- D. It is only necessary to backup application databases.

Answer: A, B, C

Question: 31

What indicates that a text note is attached to a data item?

- A. The note icon displays with lines when focus is placed on the data item to which it is attached.
- B. The note pops up when focus is placed on the data item to which it is attached.
- C. The data item to which a note is attached displays in red.
- D. You can't tell which data items have notes.

Answer: A

Question: 32

Which of the following options can you change within Microsoft Dynamics SL? Choose the 2 that apply.

- A. Control the display of grid row numbers
- B. Define a network drive
- C. Define shortcut keys
- D. Control the display of grid lines

Answer: A, D

Question: 33

What is the purpose of the Microsoft Dynamics SL Navigation Level function?

- A. Control how the cursor moves through a Microsoft Dynamics SL window when you are pressing the TAB key.
- B. Rearrange the order Microsoft Dynamics SL modules are listed on the Module menu according to user-specified settings.
- C. Establish user-defined settings that automatically open certain Microsoft Dynamics SL windows when the user logs into Solomon.
- D. Control how Microsoft Dynamics SL navigates through batch or document records.

Answer: D

Question: 34

Which of the multi-item selection techniques are supported when a Microsoft Dynamics SL window is in grid view?

- A. Left mouse click and drag
- B. Right mouse click and drag

- C. CTRL and arrow keys
- D. Right mouse click and enter row numbers to copy

Answer: A

Question: 35

How do you change the password for the Master user?

- A. Use Microsoft Enterprise Manager to change the password for the Master Login.
- B. Log into Microsoft Dynamics SL as Sysadmin and then open the Change Password screen on the Utility menu.
- C. Open the Database Administration screen and change the password on the line with a blank Database Name field.
- D. Master's password cannot be changed after it is set during the initial creation of the database.

Answer: C

Question: 36

What is a Microsoft Dynamics SL template?

- A. A general Microsoft Dynamics SL window customization that serves as the basis for user-specific customizations of the same window.
- B. An Application database that contains core data (accounts, sub accounts, etc.) used by all Application databases from which you can quickly create other Application databases.
- C. A set of commonly used window data saved and entered as a block to help reduce a repetitive keying in the window.
- D. The default settings from Microsoft Dynamics SL application setup windows that appear in data entry and maintenance windows.

Answer: C

Question: 37

Which of the following are true of Microsoft Dynamics SL templates? Choose the 2 that apply.

- A. The template level options are the same for all Microsoft Dynamics SL windows.
- B. Templates can be private or public.
- C. Templates can be created for reports as well as data entry, maintenance, and setup windows.
- D. Templates are not a feature of Microsoft Dynamics SL.

Answer: B, C

Question: 38

How can you access the inquiry (P V) window on a field that supports this feature? Choose the 2 that apply.

- A. Press the F3 key.
- B. Click the Inquiry button next to the field.
- C. Press the F4 key.
- D. Double right click in the field.

Answer: A, D

Question: 39

Microsoft Dynamics SL's extended report options include which of the following? Choose the 2 that apply.

- A. Options for sorting and selecting
- B. Microsoft Dynamics SL short-cut keys
- C. Total and page break settings
- D. Options for deleting records

Answer: A, C

Question: 40

How do you switch between grid view and form view in Microsoft Dynamics SL windows? Choose the 2 that apply.

- A. Toggle the grid functions on and off in the Options menu.
- B. Double-click the left mouse button when the cursor is over one of the window's detail area headings.
- C. Press ALT + G and ALT + F as necessary.
- D. Place the cursor in a detail area field and press F4.

Answer: B, D

Question: 41

What is the purpose of the Microsoft Dynamics SL Note function?

- A. To print reports.
- B. Provide a way to add custom, display-only fixed text to Microsoft Dynamics SL windows.
- C. Attach unique or confidential information to Microsoft Dynamics SL data items.
- D. Provide a way of visually indicating that certain window fields are required fields.

Answer: C

Question: 42

Which of the following situations would prompt you to run a module integrity check? Choose the 2 that apply.

- A. Customer balance in Customer Maintenance does not match the total of documents on the Customer Trial Balance Report
- B. Accounts Receivables history does not correspond to documents
- C. Users receive an error when they attempt to open an Accounts Receivable screen
- D. Un-released Accounts Payables batches are not showing the vendor history

Answer: A, B

Question: 43

What Microsoft Dynamics SL window would you open to create a new application database?

- A. Database Administration (98.270.00)
- B. Database Update (DB.UPD.ATE)
- C. Database Physical Integrity (95.500.00)
- D. Database Maintenance (98.290.00)

Answer: D

Question: 44

If you are working in one Application database and want to begin working in another Application database how do you login to the new company? Choose the 3 that apply.

- A. Exit Microsoft Dynamics SL after saving all changes; then start a new session choosing the new company.
- B. Use Microsoft Dynamics SL's Close Company function to close the current database; then, use the Open Company command to open the new database.
- C. Simply use Microsoft Dynamics SL's Open Company function; Microsoft Dynamics SL supports multiple Application databases open at the same time.
- D. Use the Switch Company icon to exit and login to a new company.

Answer: A, B, D

Question: 45

Which Microsoft Dynamics SL toolbar button(s) would you click to save the current record and prepare for entry of a new record? Choose the 2 that apply.

- A. Save + New
- B. Close + New
- C. Close
- D. Finish

Answer: A, D

Question: 46

What is the extent of Microsoft Dynamics SL's module-level logical integrity checking capabilities? Choose the 2 that apply.

- A. Compare
- B. Validate
- C. Rebuild Indexes
- D. Delete Indexes

Answer: A, B

Question: 47

How do you re-route a Microsoft Dynamics SL report to a file?

- A. Use the report window's Print Preview functions, click the Print button, and define the output file name.
- B. Use the report window's Template tab to set up a report template with the report file name as the output device option.
- C. Click the print options button and use the Print Options (98.20.00) window to choose Print to File.
- D. Select the Print to File option on the Company Selection tab.

Answer: C

Question: 48

Which of the following is NOT written to a Microsoft Dynamics SL event log?

- A. Process and user IDs
- B. Corrective actions for events with errors
- C. Process execution date
- D. Log view date

Answer: B

Question: 49

When should you perform Microsoft Dynamics SL database physical integrity? Choose the 2 that apply.

- A. Prior to installing program and database updates
- B. When SQL errors occur during processing
- C. When the General Ledger Trial Balance is out of balance
- D. When a particular workstation locks up when logging into Microsoft Dynamics SL

Answer: A, B

Question: 50

Which of the following are standard Microsoft Dynamics SL selections on the printer options screen? Choose the 3 that apply.

- A. Print to File
- B. Convert to a Microsoft Word Document
- C. Save As Default
- D. Use Windows Default Printer

Answer: A, C, D
