Introduction	xv
--------------------	----

Part I

J2ME Basics

 1	J2ME Overview	3
	Java 2 Micro Edition and the World of Java	4
	Enter Java	5
	Java Virtual Machine	6
	J2EE and J2SE	6
	The Birth of J2EE	8
	Back to the Future: J2ME	8
	Inside J2ME	9
	How J2ME Is Organized	12
	J2ME and Wireless Devices	14
	What J2ME Isn't	15
	Other Java Platforms for Small Computing Devices	16

2	Small Computing Technology	17
	Wireless Technology	18
	Radio Transmission	20
	Limitations of Radio Transmissions	20
	Radio Data Networks	22
	Data Packets	23
	Microwave Technology	24
	Satellite Networks	24
	Mobile Radio Networks	25
	Cellular Telephone Networks	26
	Digital Wireless Transmissions	28
	Cell Phones and Text Input	28
	Messaging	29
	Personal Digital Assistants	30
	Mobile Power	31
	Set-Top Boxes	32
	Inside Look at a Set-Top Box	33
	Smart Cards	34
3	J2ME Architecture and Development Environment	35
	J2ME Architecture	36
	Small Computing Device Requirements	37
	Run-Time Environment	37
	Inside the Java Archive File	38
	Inside the Java Application Descriptor File	40
	MIDlet Programming	42
	Event Handling	43
	User Interfaces	44
	Device Data	44
	Java Language for J2ME	45
	J2ME Software Development Kits	48
	Hello World J2ME Style	50
	Compiling Hello World	53
	Running Hello World	54
	Deploying Hello World	54
	What to Do When Your MIDlet Doesn't Work Properly	56
	Multiple MIDlets in a MIDlet Suite	57
	J2ME Wireless Toolkit	60
	Building and Running a Project	61
	Hello World Project	64
	MIDlets on the Internet	67

	4	J2ME Best Practices and Patterns	71
		The Reality of Working in a J2ME World	72
		Best Practices	73
		Keep Applications Simple	73
		Keep Applications Small	74
		Limit the Use of Memory	75
		Off-Load Computations to the Server	76
		Manage Your Application's Use of a Network Connection	77
		Simplify the User Interface	79
		Use Local Variables	81
		Don't Concatenate Strings	81
		Avoid Synchronization	82
		Thread Group Class Workaround	83
		Upload Code from the Web Server	83
		Reading Settings from JAD Files	84
		Populating Drop-down Boxes	85
		Minimize Network Traffic	86
		Dealing with Time	86
		Automatic Data Synchronization	88
		Updating Data that Has Changed	89
		Be Careful of the Content of the startApp() Method	90

Part II

J2ME User Interface

	5	Commands, Items, and Event Processing	95
		J2ME User Interfaces	96
		Display Class	96
		The Palm OS Emulator	102
		Command Class	103
		CommandListener	105
		Item Class	111
		Item Listener	114
		Exception Handling	118
		Throwing a MIDletStateChangeException	120
		Quick Reference Guide	125
	6	High-Level Display: Screens	129
		Screen Class	130

Alert Class	131
Alert Sound	138
Form Class	139
Item Class	143
ChoiceGroup Class	144
DateField Class	154
Gauge Class	158
StringItem Class	166
TextField Class	170
ImageItem Class	178
List Class	182
Creating an Instance of a List Class	184
TextBox Class	194
Creating an Instance of a TextBox Class	195
Ticker Class	199
Quick Reference Guide	203

7 Low-Level Display: Canvas	213
The Canvas	214
The Layout of a Canvas	215
Proportional Coordinates	216
The Pen	217
Painting	217
showNotify() and hideNotify()	219
User Interactions	219
Working with Key Codes	220
Working with Game Actions	227
Working with Pointer Devices	233
Graphics	239
Stroke Style and Color	240
Lines	243
Rectangles	243
Arcs	250
Text	257
Images	266
Repositioning Text and Images	274
Clipping Regions	279
Creating a Clipping Region	280
Animation	284
Quick Reference Guide	286

Part III

J2ME Data Management

	8	Record Management System	295
		Record Storage	296
		The Record Store	296
		Record Store Scope	297
		Setting Up a Record Store	298
		Writing and Reading Records	302
		Creating a New Record and Reading an Existing Record	303
		Writing and Reading Mixed Data Types	309
		Record Enumeration	316
		Reading a Record of a Simple Data Type into a RecordEnumeration	319
		Reading a Mixed Data Type Record into a RecordEnumeration	324
		Sorting Records	330
		Sorting Single Data Type Records in a RecordEnumeration	332
		Sorting Mixed Data Type Records in a RecordEnumeration	337
		Searching Records	345
		Searching Single Data Type Records	345
		Searching Mixed Data Type Records	352
		RecordListener	359
		Quick Reference Guide	360
	9	J2ME Database Concepts	365
		Data	366
		Databases	367
		Tables	367
		Database Schema	368
		Identifying Information	369
		Decomposing Attributes to Data	372
		Defining Data	375
		Normalizing Data	377
		Grouping Data	378
		Creating Primary Keys	380
		Functional Dependency	382
		Transitive Dependencies	382

Foreign Keys	383
Referential Integrity	384
The Art of Indexing	385
An Index in Motion	386
Drawbacks of Using an Index	386
Clustered Keys	387
Derived Keys	388
Selective Rows	388
Exact Matches and Partial Matches	389
Searching for Phonetic Matches	389

10 JDBC Objects	391
The Concept of JDBC	392
JDBC Driver Types	393
Type 1 JDBC to ODBC Driver	393
Type 2 Java/Native Code Driver	394
Type 3 JDBC Driver	394
Type 4 JDBC Driver	394
JDBC Packages	394
Overview of the JDBC Process	394
Load the JDBC Driver	395
Connect to the DBMS	395
Create and Execute an SQL Statement	395
Process Data Returned by the DBMS	396
Terminate the Connection to the DBMS	397
Database Connection	398
The Connection	398
Timeout	401
Connection Pool	402
Statement Objects	403
The Statement Object	403
PreparedStatement Object	406
CallableStatement	407
ResultSet	409
Reading the ResultSet	410
Scrollable ResultSet	411
Specify Number of Rows to Return	414
Updatable ResultSet	415
Transaction Processing	419
Savepoints	421
Batch Statements	422
Keeping ResultSet Objects Open	424

RowSet	424
Autogenerated Keys	426
Metadata	426
ResultSet Metadata	426
Data Types	427
Exceptions	428
Quick Reference Guide	429

11	JDBC and Embedded SQL	453
	Model Programs	454
	Model A Program	455
	Model B Program	457
	Tables	460
	Create a Table	460
	Drop a Table	462
	Indexing	463
	Create an Index	463
	Drop an Index	465
	Inserting Data into Tables	465
	Insert a Row	466
	Insert the System Date into a Column	466
	Insert the System Time into a Column	467
	Insert a Timestamp into a Column	467
	Selecting Data from a Table	468
	Select All Data from a Table	469
	Request One Column	470
	Request Multiple Columns	471
	Request Rows	472
	Request Rows and Columns	472
	AND, OR, and NOT Clauses	473
	Join Multiple Compound Expressions	474
	Equal and Not Equal Operators	475
	Less Than and Greater Than Operators	477
	Less Than or Equal to and Greater Than or Equal To	478
	Between Operator	479
	LIKE Operator	480
	IS NULL Operator	480
	DISTINCT Modifier	481
	IN Modifier	482
	Metadata	483
	Number of Columns in ResultSet	483
	Data Type of Column	484

Name of Column	484
Column Size	484
Updating Tables	485
Update Row and Column	485
Update Multiple Rows	486
Deleting Data from a Table	490
Delete a Row from a Table	490
Joining Tables	491
Join Two Tables	494
Parent-Child Join	495
Multiple Comparison Join	496
Multitable Join	497
Create a Column Name Qualifier	498
Create a Table Alias	499
Inner and Outer Joins	500
Calculating Data	504
SUM()	506
AVG()	507
MIN()	507
MAX()	508
COUNT()	508
Count All Rows in a Table	509
Retrieve Multiple Counts	509
Calculate a Subset of Rows	510
NULLs and Duplicates	511
Calculate Without Using Built-in Functions	511
Grouping and Ordering Data	512
GROUP BY	513
Group Multiple Columns	514
Conditional Grouping	515
Working with NULL Columns	516
Sorting Data	516
Sorting on Derived Data	518
Subqueries	519
Create a Subquery	520
Conditional Testing	521
VIEWS	525
Rules for Using VIEWS	525
Create a VIEW	527
Select Columns to Appear in the VIEW	528
Create a Horizontal VIEW	528
Create a Multitable VIEW	529
Group and Sort VIEWS	529
Modify a VIEW	530

Part IV**J2ME Personal Information Manager Profile**

12	Personal Information Manager	535
	PIM Databases	536
	The Contact Database	538
	The Event Database	539
	The To Do Database	540
	Error Handling	541
	A Model PIM Application	541
	Quick Reference Guide	557

Part V**J2ME Networking and Web Services**

13	Generic Connection Framework	575
	The Connection	576
	Connection and Streams	577
	Hypertext Transfer Protocol	580
	Creating an HTTP Connection	580
	Reading Data from an HTTP Connection	582
	The File Protocol	589
	Socket	592
	Communication Management Using HTTP Commands	597
	HttpConnection	598
	Session Management	608
	Cookies	610
	Transmit as a Background Process	610
	Quick Reference Guide	614
14	Web Services	617
	Web Services Basics	618
	The Tier	618
	Clients, Resources, and Components	620
	Accessing Services	621
	J2EE Multi-Tier Web Services Architecture	621
	Client Tier Implementation	624
	Classification of Clients	624
	Web Tier Implementation	625
	Enterprise JavaBeans Tier Implementation	626
	Enterprise Information Systems Tier Implementation	627

Inside WSDL	629
The WSDL Document	629
Types Element	632
Message Element	632
portType Element	633
Binding Element	634
Port Element	635
Service Element	635
J2ME MIDlets and Web Services	636
JAX-RPC	637
Holder Classes	637
Remote Method Invocation Concept	639
Remote Interface	639
SOAP Basics	639
SOAP Functionality	640
The SOAP Message and Delivery Structure	640
WSDL and SOAP	641
SOAP One-Way Transmission Primitive	642
SOAP Request-Response Transmission Primitive	643
SOAP Binding Element	645
SOAP Operation Element	645
SOAP Body Element	646
SOAP Fault Element	646
SOAP Header Element	646
SOAP Address Element	647
WSDL and HTTP Binding	647
Quick Reference Guide	649
 Appendix: Quick Reference Guide	653
 Index	721
